## SAFETY DATA SHEET

Date of issue : 6 February 2024

Version : 5

# pPG

## Section 1. Identification

Product code	: 40199-C2008/6L
Product name	: SIGMAWELD 199 PASTE RED BROWN
Product type	: Liquid.
Recommended use and res	<u>strictions</u>
Use of the substance/ mixture	: Coating.
Uses advised against	: Not applicable.
Supplier's details	: PPG INDUSTRIES NEW ZEALAND LTD 5 MONAHAN ROAD, MT WELLINGTON, AUCKLAND www.ppgnz.co.nz Telephone Numbers: 09 573 1620, 0800 659378 021 940 920 (24 Hours)
Emergency telephone number (with hours of operation)	: New Zealand 0800 000 096 (24 hours) / Australia 1800 883 254 (24 hours) For international shipping emergencies: 1-412-391-1618
e-mail address of person responsible for this SDS	: ehsnz@ppg.com

## Section 2. Hazards identification

HSNO Classification	: FLAMMABLE LIQUIDS - Category 3
	SKIN IRRITATION - Category 2 EYE IRRITATION - Category 2
	SKIN SENSITISATION - Category 1
	CARCINOGENICITY - Category 2
	REPRODUCTIVE TOXICITY - Category 2
	SPECIFIC TARGET ORGAN TOXICITY - SINGLE EXPOSURE - Category 2
	SPECIFIC TARGET ORGAN TOXICITY - REPEATED EXPOSURE - Category 2
	SHORT-TERM (ACUTE) AQUATIC HAZARD - Category 1
	LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 1
Symbol	
	JAN AL
	$\langle \langle \rangle \rangle \langle \langle \rangle \rangle \langle \langle \rangle \rangle \langle \langle \rangle \rangle$
GHS label elements	
Signal word	: Warning
<b>U</b>	5

#### Section 2. Hazards identification

Hazard statements	<ul> <li>Mammable liquid and vapour.</li> <li>Causes skin irritation.</li> <li>May cause an allergic skin reaction.</li> <li>Causes serious eye irritation.</li> <li>Suspected of causing cancer.</li> <li>Suspected of demonstration fortility on the unborn shild.</li> </ul>
	Suspected of damaging fertility or the unborn child. May cause damage to organs. May cause damage to organs through prolonged or repeated exposure. Very toxic to aquatic life with long lasting effects.
Precautionary statements	
Prevention	: Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Do not breathe vapour. Wash thoroughly after handling.
Response	: Collect spillage. IF exposed or concerned: Call a POISON CENTER or doctor. Take off contaminated clothing and wash it before reuse. IF ON SKIN: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice or attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention.
Storage	: Not applicable.
Disposal	: Dispose of contents and container in accordance with all local, regional, national and international regulations.
Other hazards which do not result in classification	: Prolonged or repeated contact may dry skin and cause irritation.

This material is classified as hazardous according to criteria in the Hazardous Substances (Minimum Degrees of Hazard) Notice 2017 and has been classified according to the Hazardous Substances (Classifications) Notice 2017.

This material is classified as DANGEROUS GOODS according to criteria in New Zealand Land Transport Rule: Dangerous Goods 2005.

## Section 3. Composition/information on ingredients

Substance/mixture	1	Mixture
<b>CAS number/other identifiers</b>		
Product code	:	40199-C2008/6L

Hazardous ingredients	%	CAS number
Zinc powder - zinc dust (stabilized)	30 - 60	7440-66-6
xylene	10 - <30	1330-20-7
1-methoxy-2-propanol	1 - <10	107-98-2
ethylbenzene	1 - <10	100-41-4
Isopropyl alcohol	1 - <10	67-63-0
Fatty acids, C18-unsatd., trimers, compds. with oleylamine	<1	147900-93-4
Fatty acids, tall-oil, compds. with oleylamine	<1	85711-55-3

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment or have an OEL and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

Description of necessary fi	rst aid measures	
Eye contact	Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.	
Inhalation	: Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.	
Skin contact	<ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.</li> </ul>	
Ingestion	<ul> <li>If swallowed, seek medical advice immediately and show the container or label.</li> <li>Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>	
Most important symptoms/	effects, acute and delayed	
Potential acute health effe	<u>cts</u>	
Eye contact	: Causes serious eye irritation.	
Inhalation	: No known significant effects or critical hazards.	
Skin contact	: May cause damage to organs following a single exposure in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.	
Ingestion	: May cause damage to organs following a single exposure if swallowed.	
Over-exposure signs/sym	<u>ptoms</u>	
Eyes	: Adverse symptoms may include the following: pain or irritation watering redness	
Inhalation	: Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations	
Skin	: Adverse symptoms may include the following: irritation redness dryness cracking reduced foetal weight increase in foetal deaths skeletal malformations	
Ingestion	: Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations	
Indication of immediate me	dical attention and special treatment needed, if necessary	
Specific treatments	: Not available.	
Notes to physician	<ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.</li> </ul>	
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.	
See toxicological information	•	

See toxicological information (Section 11)

## Section 5. Firefighting measures

#### Extinguishing media

Suitable	se dry chemical, CO <sub>2</sub> , water spray (fog) or foam.	
Not suitable	o not use water jet.	
Specific hazards arising from the chemical	ammable liquid and vapour. Runoff to sewer may create fire or explosion h a fire or if heated, a pressure increase will occur and the container may but re risk of a subsequent explosion. This material is very toxic to aquatic life ng lasting effects. Fire water contaminated with this material must be contain nd prevented from being discharged to any waterway, sewer or drain.	ırst, with with
Hazardous thermal decomposition products	ecomposition products may include the following materials: arbon oxides letal oxide/oxides	
Special precautions for fire- fighters	romptly isolate the scene by removing all persons from the vicinity of the ind ere is a fire. No action shall be taken involving any personal risk or without uitable training. Move containers from fire area if this can be done without r se water spray to keep fire-exposed containers cool.	t
Special protective equipment for fire-fighters	ire-fighters should wear appropriate protective equipment and self-containe reathing apparatus (SCBA) with a full face-piece operated in positive press lode.	

## Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	:	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".		
Environmental precautions	:	: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.		
Methods and material for cor	<u>nta</u>	inment and cleaning up		
Small spill	:	Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.		
Large spill	:	Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.		

## Section 7. Handling and storage

Precautions for safe : handling	Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.
Conditions for safe storage, : including any incompatibilities	Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

## Section 8. Exposure controls/personal protection

ngredient name	Exposure limits
ylene	HSWA 2015 - HSW (GRWM) 2016. Workplace exposure standards (WES) (New Zealand, 4/2022). [xylene (o-, m-, p-
	isomers)] WES-TWA: 217 mg/m <sup>3</sup> 8 hours. WES-TWA: 50 ppm 8 hours.
-methoxy-2-propanol	HSWA 2015 - HSW (GRWM) 2016.
	Workplace exposure standards (WES)
	(New Zealand, 4/2022).
	WES-STEL: 553 mg/m <sup>3</sup> 15 minutes.
	WES-STEL: 150 ppm 15 minutes.
	WES-TWA: 369 mg/m <sup>3</sup> 8 hours.
	WES-TWA: 100 ppm 8 hours.
thylbenzene	HSWA 2015 - HSW (GRWM) 2016.
	Workplace exposure standards (WES)
	(New Zealand, 4/2022). Absorbed throug
	<b>skin.</b> WES-STEL: 176 mg/m <sup>3</sup> 15 minutes.
	WES-STEL: 40 ppm 15 minutes.
	WES-TWA: 88 mg/m <sup>3</sup> 8 hours.
	WES-TWA: 20 ppm 8 hours.
sopropyl alcohol	HSWA 2015 - HSW (GRWM) 2016.
	Workplace exposure standards (WES)

#### Product name SIGMAWELD 199 PASTE RED BROWN

## Section 8. Exposure controls/personal protection

-		• •	
		(New Zealand, 4/2022). WES-STEL: 1230 mg/m <sup>3</sup> 15 minutes. WES-STEL: 500 ppm 15 minutes. WES-TWA: 983 mg/m <sup>3</sup> 8 hours. WES-TWA: 400 ppm 8 hours.	
Recommended monitoring procedures	:	Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.	
Appropriate engineering controls	:	Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.	
Environmental exposure controls	:	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.	
Individual protection measu	<u>res</u>		
Hygiene measures	-	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.	
Respiratory protection	:	Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.	
Hand protection	:	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.	
Gloves	1	butyl rubber	
Eye protection	:	Chemical splash goggles.	
Skin protection	:	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.	

## **Section 9. Physical and chemical properties**

#### Appearance

Physical state	:	Liquid.		
Colour	:	Red.		
Odour	:	Aromatic.		
Odour threshold	:	Not available.		
рН	1	Not applicable.		
Melting point	1	Not available.		
Boiling point	1	>37.78°C (>100°F)		
Flash point	:	Closed cup: 25°C (77°F)	Closed cup: 25°C (77°F)	
Flammability (solid, gas)	1	Not available.		
Lower and upper explosive (flammable) limits	1	Not available.		
Vapour pressure	:	Not available.		
Relative density	:	2.13		
Bulk Density (g/cm³)	1	2.13		
Solubility/ico)		Media	Result	
Solubility(ies)	Ċ	cold water	Not soluble	
Partition coefficient: n- octanol/water	:	Not applicable.		
Auto-ignition temperature	:	Not available.		
Decomposition temperature	:	Not available.		
Viscosity	:	Kinematic (40°C (104°F)):	: >21 mm²/s (>21 cSt)	

## Section 10. Stability and reactivity

Stability	: The product may not be stable under certain conditions of storage or use.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition.
Incompatible materials	: Reactive or incompatible with the following materials: oxidising materials strong acids strong alkalis
Hazardous decomposition products Hazardous polymerisation	<ul> <li>Evolves hydrogen on contact with water. Depending on conditions, decomposition products may include the following materials: carbon oxides metal oxide/oxides</li> <li>Under normal conditions of storage and use, hazardous polymerisation will not occur.</li> </ul>

## Section 11. Toxicological information

#### Information on likely routes of exposure

Inhalation	:	No known significant effects or critical hazards.		
Ingestion	:	May cause damage to organs following a single exposure if swallowed.		
Skin contact	:	May cause damage to organs following a single exposure in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.		
Eye contact	:	Causes serious eye irritation.		
Symptoms related to the ph	ysic	cal, chemical and toxicological characteristics		
Inhalation	:	Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations		
Ingestion	:	Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations		
Skin contact	:	Adverse symptoms may include the following: irritation redness dryness cracking reduced foetal weight increase in foetal deaths skeletal malformations		
Eye contact	:	Adverse symptoms may include the following: pain or irritation watering redness

## Section 11. Toxicological information

#### Aspiration hazard

Not available.

#### Numerical measures of toxicity

#### Acute toxicity estimates

Route	ATE value
Dermal	2278.85 mg/kg 6742.74 mg/kg 672.8 mg/l

#### **Other information**

**Ecotoxicity** 

Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

## Section 12. Ecological information

: This material is very toxic to aquatic life with long lasting effects.

#### Aquatic and terrestrial toxicity

Product/ingredient name	Result	Species	Exposure
Inc powder - zinc dust (stabilized)	Acute EC50 0.106 mg/l Fresh water	Algae - Pseudokirchneriella subcapitata	72 hours

## Section 12. Ecological information

Do not allow to enter drains or watercourses.

## Section 13. Disposal considerations

Disposal methods	: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
Not suitable:	Do not allow to enter drains or watercourses

#### ot allow to enter drains or watercourses.

The classification of the product may meet the criteria for a hazardous waste. Disposal should be in accordance with applicable regional, national and local laws and regulations. Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL

PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures

## 14 Transport information

	NZ	IMDG	ΙΑΤΑ
UN number	UN1263	UN1263	UN1263
UN proper shipping name	PAINT	PAINT	PAINT
Transport hazard class(es)	3	3	3
	PARAMELE V		
Packing group			
Environmental hazards	Yes.	Yes.	Yes. The environmentally hazardous substance mark is not required.
Marine pollutant substances	(Zinc powder - zinc dust (stabilized))	(Zinc powder - zinc dust (stabilized))	Not applicable.

#### Additional information

NZ	: The marine pollutant mark is not required when transported by road or rail.
Hazchem code	: •3Y
IMDG	: The marine pollutant mark is not required when transported in sizes of $\leq$ 5 L or $\leq$ 5 kg.

**New Zealand** Page: 11/13

Date of issue 6 February 2024 Version 5

#### Product name SIGMAWELD 199 PASTE RED BROWN

#### 14. Transport information

IATA

: The environmentally hazardous substance mark may appear if required by other transportation regulations.

## **Special precautions for user : Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not applicable.

to IMO instruments

## Section 15. Regulatory information

New Zealand Inventory of Chemicals (NZIoC)	:	All components are listed or exempted.		
HSNO Approval Number	:	HSR002669 Flammable, Toxic [6.7]		
Emergency Management Regulations	: Level 1: Labelling required when 1L is present in a workplace.			
		Level 2: MSDS required when any amount is present in a workplace. At least 2 x 4.5 kg powder fire extinguishers required when 500L is present in a workplace.		
		Level 3: Emergency Response Plans and Secondary Containment required when 1000L is stored.		
		Flammable Signage required when 1000L is present in a workplace.		
Classes 1 to 5 Control Regulations	:	Hazardous Atmosphere Zones required for quantities greater than: 100L (closed), 25L (decanting), 5L (open occasionally), 1L (open continuously). Hazardous Substances Location Certificate required for quantities greater than: 1500L (containers up to 5L), 500L (containers >5L), 250L (open containers).		
Approved Handler	:	Not applicable.		
International regulations				
Chemical Weapon Convention List Schedules I, II & III Chemicals				
Not listed.				
Montreal Protocol				
Not listed.				
Stockholm Convention on Persistent Organic Pollutants				
Not listed.				
Rotterdam Convention on Prior Informed Consent (PIC)				
Not listed.				
UNECE Aarhus Protocol on POPs and Heavy Metals Not listed.				

#### Product name SIGMAWELD 199 PASTE RED BROWN
