# **SAFETY DATA SHEET**

## Conforms to Official Mexican Standard NOM-018-STPS-2015

Date of revision 8 February 2024

Version 7

Date of issue 8 February 2024

# SECTION 1: Identification of the substance/mixture and of the company/undertaking

| Product name                         | : MULTIPRIME 4360 LVOC GRAY PRIMER  |
|--------------------------------------|---|
| Product code                         | : 00396483  |
| Other means of<br>identification     | : Not applicable.   |
| Product type                         | : Liquid.   |
| Relevant identified uses of          | the substance or mixture and uses advised against   |
| Product use                          | : Consumer applications, Professional applications, Used by spraying.   |
| Use of the substance/<br>mixture     | : Coating.  |
| Uses advised against                 | Not applicable.   |
| Manufacturer                         | : PPG Industries, Inc.<br>One PPG Place<br>Pittsburgh, PA 15272   |
| <u>Emergency telephone</u><br>number | : (412) 434-4515 (U.S.)<br>(514) 645-1320 (Canada)<br>SETIQ Interior de la República: 800-00-214-00 (México)<br>SETIQ Ciudad de México: (55) 5559-1588 (México) |
| <b>Technical Phone Number</b>        | : 888-977-4762  |

# **SECTION 2: Hazards identification**

| <u>GHS label elements</u><br>Hazard pictograms | <ul> <li>TOXIC TO REPRODUCTION - Category 1B<br/>SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) -<br/>Percentage of the mixture consisting of ingredient(s) of unknown acu<br/>(oral), 71% (dermal), 18.8% (inhalation)</li> <li>:</li> </ul> |            |
|--|---|------------|
| Signal word                                    | : Danger  | Page: 1/15 |

# Product name MULTIPRIME 4360 LVOC GRAY PRIMER

# **SECTION 2: Hazards identification**

| Hazard statements                                   | <ul> <li>Flammable liquid and vapor.</li> <li>May be harmful in contact with</li> <li>Causes skin irritation.</li> <li>Causes serious eye irritation.</li> <li>May cause cancer.</li> <li>May damage fertility or the unk</li> <li>May cause damage to organs ng organs)</li> </ul>   |   |
|---|---|---|
| Precautionary statements                            |   |   |
| General   | - Read label before use.<br>- Keep out of reach of children.<br>- If medical advice is needed, ha   | ave product container or label at hand.   |
| Prevention  | - Wear protective gloves, protect   | recautions have been read and understood.<br>tive clothing and eye or face protection.<br>aces, sparks, open flames and other ignition  |
| Response  | + P361 + P353 - IF ON SKIN (o<br>ng. Rinse skin with water.<br>+ P312, P352 - IF ON SKIN: Ca<br>I. Wash with plenty of water.<br>+ P313 - If skin irritation occurs:<br>+ P351 + P338 - IF IN EYES: Ri<br>ve contact lenses, if present and   | ed: Get medical advice or attention.<br>r hair): Take off immediately all contaminated<br>II a POISON CENTER or doctor if you feel<br>Get medical advice or attention.<br>inse cautiously with water for several minutes.<br>d easy to do. Continue rinsing.<br>: Get medical advice or attention.  |
| Storage   | - Store locked up.  |   |
| Disposal  | <ul> <li>Dispose of contents and conta<br/>al and international regulations.</li> </ul>   | iner in accordance with all local, regional,  |
| Other hazards which do not result in classification | SPONTANEOUSLY CATCH FIF<br>DIATELY AFTER EACH USE, F<br>ALED WATER-FILLED METAL (<br>be harmful if inhaled. Prolonged<br>on. Repeated exposure to high<br>spiratory system and permanen-<br>tion of vapor/aerosol concentrat<br>s headaches, drowsiness and n<br>. This product contains crystallin<br>is. The risk of cancer depends | R WASTE SOAKED WITH THIS PRODUCT<br>RE IF IMPROPERLY DISCARDED.<br>PLACE RAGS, STEEL WOOL OR WASTE IN<br>CONTAINER. Sanding and grinding dusts<br>or repeated contact may dry skin and cause<br>vapor concentrations may cause irritation of<br>t brain and nervous system damage.<br>tions above the recommended exposure limits<br>ausea and may lead to unconsciousness or<br>ne silica which can cause lung cancer or<br>on the duration and level of exposure to dust<br>oray applications. Emits toxic fumes when |
| See toxicological information                       | 11)   |   |
|   |   |   |

### Product name MULTIPRIME 4360 LVOC GRAY PRIMER

# **SECTION 3: Composition/information on ingredients**

| Substance/mixture |
|-------------------|
| Product name      |

- Mixture τ.
- oduct name Other means of identification
- : MULTIPRIME 4360 LVOC GRAY PRIMER
- : Not applicable.

| Identification  |

| Ingredient name |
| Viene           |

| Ingredient name                                     | %           | CAS number |
|---|-------------|------------|
| xylene  | ≥10 - ≤15   | 1330-20-7  |
| pentan-2-one  | ≥1.0 - ≤4.5 | 107-87-9   |
| titanium dioxide                                    | ≥1.0 - ≤5.0 | 13463-67-7 |
| ethylbenzene  | ≥1.0 - ≤3.6 | 100-41-4   |
| Wollastonite  | ≥1.0 - ≤5.0 | 13983-17-0 |
| 4-methylpentan-2-one                                | <1.0        | 108-10-1   |
| crystalline silica, respirable powder (<10 microns) | <1.0        | 14808-60-7 |
| crystalline silica, respirable powder (>10 microns) | ≤1.0        | 14808-60-7 |
| 2-ethylhexanoic acid, zirconium salt                | ≤1.0        | 22464-99-9 |
| 2-butanone oxime                                    | <1.0        | 96-29-7    |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

# SECTION 4: First aid measures

### **Description of necessary first aid measures**

| Eye contact  | : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.  |
|--------------|--|
| Inhalation   | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. |
| Skin contact | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.   |
| Ingestion    | : If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.   |

### Most important symptoms/effects, acute and delayed

#### Potential acute health effects

| Eye contact  | : Causes serious eye irritation.  |
|--------------|---|
| Inhalation   | : No known significant effects or critical hazards.                                   |
| Skin contact | : May be harmful in contact with skin. Causes skin irritation. Defatting to the skin. |
| Ingestion    | : No known significant effects or critical hazards.                                   |

**Over-exposure signs/symptoms** 

See toxicological information (Section 11)

#### Indication of immediate medical attention and special treatment needed, if necessary

| Notes to physician  | : Treat symptomatically. Contact poison treatment specialist immediately if large |
|---------------------|---|
|                     | quantities have been ingested or inhaled.   |
| Specific treatments | : No specific treatment.  |

# **SECTION 4: First aid measures**

```
Protection of first-aiders

No action shall be taken involving any personal risk or without suitable training. If it

is suspected that fumes are still present, the rescuer should wear an appropriate

mask or self-contained breathing apparatus. It may be dangerous to the person

providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing

thoroughly with water before removing it, or wear gloves.
```

# **SECTION 5: Firefighting measures**

| Extinguishing media                            |  |
|--|--|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media                 | : Do not use water jet.  |
| Specific hazards arising from the chemical     | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion.  |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon oxides<br>phosphorus oxides<br>metal oxide/oxides  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

# **SECTION 6: Accidental release measures**

| Personal precautions, protective equipment and emergency procedures |     |   |
|---|-----|---|
| For non-emergency<br>personnel                                      | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders  | :   | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions   | :   | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).   |
| Methods and materials for co  | nta | ainment and cleaning up   |
| Small spill   | :   | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble.   |

Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

# SECTION 6: Accidental release measures

Large spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with noncombustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

# **SECTION 7: Handling and storage**

### Precautions for safe handling

| Protective measures  | : | Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Avoid exposure during pregnancy. Do not<br>handle until all safety precautions have been read and understood. Do not get in<br>eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only<br>with adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Do not enter storage areas and confined spaces unless adequately<br>ventilated. Keep in the original container or an approved alternative made from a<br>compatible material, kept tightly closed when not in use. Store and use away from<br>heat, sparks, open flame or any other ignition source. Use explosion-proof electrical<br>(ventilating, lighting and material handling) equipment. Use only non-sparking tools.<br>Take precautionary measures against electrostatic discharges. Empty containers<br>retain product residue and can be hazardous. Do not reuse container. |
|--|---|---|
| Special precautions  | : | Vapors may accumulate in low or confined areas or travel a considerable distance to<br>a source of ignition and flash back. Vapors are heavier than air and may spread<br>along floors. Materials such as cleaning rags, paper wipes and protective clothing,<br>which are contaminated with the product may spontaneously self-ignite some hours<br>later. To avoid the risks of fires, all contaminated materials should be stored in<br>purpose-built containers or in metal containers with tight-fitting, self-closing lids.<br>Contaminated materials should be removed from the workplace at the end of each<br>working day and be stored outside. If this material is part of a multiple component<br>system, read the Safety Data Sheet(s) for the other component or components<br>before blending as the resulting mixture may have the hazards of all of its parts.   |
| Advice on general<br>occupational hygiene                          | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Do not store above the following temperature: 50°C (122°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.   |

# **SECTION 8: Exposure controls/personal protection**

#### **Control parameters**

#### **Occupational exposure limits**

| Exposure limits                                   |
|---|
| NOM-010-STPS-2014 (Mexico, 4/2016).               |
| [Xylenes (mixed)]                                 |
| STEL: 150 ppm 15 minutes.                         |
| TWA: 100 ppm 8 hours.                             |
| NOM-010-STPS-2014 (Mexico, 4/2016).               |
| STEL: 150 ppm 15 minutes.                         |
| NOM-010-STPS-2014 (Mexico, 4/2016).               |
| TWA: 10 mg/m <sup>3</sup> 8 hours.                |
| NOM-010-STPS-2014 (Mexico, 4/2016).               |
| TWA: 20 ppm 8 hours.                              |
| ACGIH TLV (United States, 1/2023).                |

| fraction  |
| NOM-010-STPS-2014 (Mexico, 4/2016).               |
| TWA: 50 ppm 8 hours.                              |
| STEL: 75 ppm 15 minutes.                          |
| NOM-010-STPS-2014 (Mexico, 4/2016).               |
| TWA: 0.025 mg/m <sup>3</sup> 8 hours. Form:       |
| Respirable  |
| NOM-010-STPS-2014 (Mexico, 4/2016).               |
| TWA: 0.025 mg/m <sup>3</sup> 8 hours. Form:       |
| Respirable  |
| NOM-010-STPS-2014 (Mexico, 4/2016).               |
| [Zirconium compounds]                             |
| STEL: 10 mg/m³, (as Zr) 15 minutes.               |
| TWA: 5 mg/m³, (as Zr) 8 hours.                    |
| IPEL (-).   |
| TWA: 3 ppm  |
| STEL: 9 ppm                                       |
|   |

#### Key to abbreviations

# C= Ceiling LimitSTEL= Short term exposure limitIPEL= Internal Permissible Exposure LimitTLV= Threshold Limit ValueTWA= Time Weighted Average

#### Consult local authorities for acceptable exposure limits.

| Recommended monitoring procedures   | : Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.   |
|-------------------------------------|---|
| Appropriate engineering<br>controls | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment. |
| Environmental exposure<br>controls  | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |

### Individual protection measures

| Mexico | Page: 6/15 |
|--------|------------|
|--------|------------|

# Product name MULTIPRIME 4360 LVOC GRAY PRIMER

# **SECTION 8: Exposure controls/personal protection**

| Hygiene measures       | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location.   |
|------------------------|---|
| Eye/face protection    | : Chemical splash goggles.  |
| Skin protection        |   |
| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Gloves                 | : For prolonged or repeated handling, use the following type of gloves:   |
|                        | Not recommended: nitrile rubber<br>Recommended: Chloroprene, polyvinyl alcohol (PVA), Viton®  |
| Body protection        | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.  |

# **SECTION 9: Physical and chemical properties**

| <u>Appearance</u>                            |                             |

# SECTION 10: Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.<br>Refer to protective measures listed in sections 7 and 8. |
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.              |
| Hazardous decomposition products   | Depending on conditions, decomposition products may include the following materials carbon oxides phosphorus oxides metal oxide/oxides        |

# Product name MULTIPRIME 4360 LVOC GRAY PRIMER

# **SECTION 11: Toxicological information**

| Ingestion  | Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations  |   |
|--|--|---|
| Delayed and immediate effe                                 | and also chronic effects from short and long term exposure   |   |
| Conclusion/Summary   | There are no data available on the mixture itself. This product contains crystal silica which can cause lung cancer or silicosis. The risk of cancer depends on duration and level of exposure to dust from sanding surfaces or mist from spray applications. For many products, TiO2 is utilized as a raw material in a liquid of formulation. In this case, the TiO2 particles are bound in a matrix with no mean potential for human exposure to unbound particles of TiO2 when the product is applied with a brush or roller. Sanding the coating surface or mist from spray applications may be harmful depending on the duration and level of exposure a require the use of appropriate personal protective equipment and/or engineerir controls (see Section 8). Exposure to component solvent vapor concentrations excess of the stated occupational exposure limit may result in adverse health e such as mucous membrane and respiratory system irritation and adverse effects absorption through the skin. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greathearing loss than expected from exposure to noise alone. If splashed in the explicit may cause irritation and reversible damage. Ingestion may cause na diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and term exposure by oral, inhalation and dermal routes of exposure and eye contains to the source of exposure and eye contains and term exposure by oral, inhalation and dermal routes of exposure and eye contains and eye contains and eye contains and reversible damage. | the<br>ay<br>coating<br>iningfu<br>and<br>ng<br>s in<br>effects<br>cts on<br>by<br>to<br>ater<br>yes,<br>ausea,<br>al long- |

### **Mobility in soil**

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects

: No known significant effects or critical hazards.

### Product name MULTIPRIME 4360 LVOC GRAY PRIMER

# **SECTION 13: Disposal considerations**

**Disposal methods** 

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations. Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures
