# **SAFETY DATA SHEET**

Date of issue/Date of revision

: 14 February 2024 Version

: 1

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier  |   |
|---|---|
| Product name  | : SIGMA NEXEON 710 N REDBROWN                                     |
| Product code  | : 00464074  |
| Other means of identificati<br>Not available.   | on  |
| 1.2 Relevant identified uses  | of the substance or mixture and uses advised against              |
| Product use   | : Professional applications, Used by spraying.                    |
| Use of the substance/<br>mixture  | : Antifouling products  |
| Uses advised against  | : Product is not intended, labelled or packaged for consumer use. |
| 1.3 Details of the supplier of  | the safety data sheet   |
| Sigma Paint Saudi Arabia Lto<br>PO Box 7509<br>Dammam 31472<br>Saudi Arabia<br>Tel: 00966 138 47 31 00<br>Fax: 00966 138 47 17 34 | l.  |
| e-mail address of person responsible for this SDS   | : ndpic@sfda.gov.sa   |
| 1.4 Emergency telephone   | : 00966 138473100 extn 1001                                       |

## **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture Product definition : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Flam. Liq. 3, H226 Acute Tox. 4, H302 Acute Tox. 3, H331 Skin Irrit. 2, H315 Eye Dam. 1, H318 Repr. 1B, H360D STOT RE 2, H373 Aquatic Acute 1, H400 Aquatic Chronic 1, H410 The product is clearified as hererdays according to Decylation (EC) 1272/2009 of

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

number

| Code : 00464074   | Date of issue/Date of revision : 14 February 2024   |
|---|---|
| SIGMA NEXEON 710 N REDE   |   |
| SECTION 2: Hazards  | dentification   |
| Hazard pictograms   |   |
|   |   |
|   | : Danger  |
| Hazard statements   | : Flammable liquid and vapour.  |
|   | Harmful if swallowed.<br>Causes skin irritation.  |
|   | Causes serious eye damage.  |
|   | Toxic if inhaled.   |
|   | May damage the unborn child.  |
|   | May cause damage to organs through prolonged or repeated exposure.<br>Very toxic to aquatic life with long lasting effects.   |
| Precautionary statements  |   |
| Prevention  | : Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Do not breathe vapour. |
| Response  | : Collect spillage.   |
| Storage   | : Not applicable.   |
| Disposal  | : Dispose of contents and container in accordance with all local, regional, national and international regulations.<br>P280, P210, P273, P260, P391, P501   |
| Hazardous ingredients   | : pyrithione zinc<br>1H-Pyrrole-3-carbonitrile, 4-bromo-2-(4-chlorophenyl)-5-(trifluoromethyl)-   |
| Supplemental label elements   | : Contains 1,3-bis[12-hydroxy-octadecamide-N-methylene]-benzene. May produce an allergic reaction.  |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Restricted to professional users.   |
| Special packaging requiren  | <u>ints</u>   |
| Containers to be fitted<br>with child-resistant<br>fastenings   | : Not applicable.   |
| Tactile warning of danger   | : Not applicable.   |
| 2.3 Other hazards   |   |
| Product meets the criteria for PBT or vPvB  | : This mixture does not contain any substances that are assessed to be a PBT or a vPvI  |
| Other hazards which do not result in classification   | : Prolonged or repeated contact may dry skin and cause irritation.  |

SIGMA NEXEON 710 N REDBROWN

## **SECTION 3: Composition/information on ingredients**

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

#### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

| Eye contact                | : | Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.   |
|----------------------------|---|---|
|                            |   | In case of accidental eye contact, avoid direct exposure to the sun or other sources of UV light as severe irritation including burns may result. These reactions can be delayed – get medical attention if pain, irritation or blistering occurs after contact.  |
| Inhalation                 | : | Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.  |
| Skin contact               | : | Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.  |
| Ingestion                  | : | If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.  |
| Protection of first-aiders | : | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

#### 4.2 Most important symptoms and effects, both acute and delayed

| Potential acute health effects |   |   |
|--------------------------------|---|---|
| Eye contact                    | : | Causes serious eye damage.  |
| Inhalation                     | : | Toxic if inhaled.   |
| Skin contact                   | : | Causes skin irritation. Defatting to the skin.  |
| Ingestion                      | : | Harmful if swallowed.   |
| Over-exposure signs/sympto     | m | <u>s</u>  |
| Eye contact                    | : | Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |
| Inhalation                     | : | Adverse symptoms may include the following:<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations   |
| Skin contact                   | : | Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>dryness<br>cracking<br>blistering may occur<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations |
| Ingestion                      | : | Adverse symptoms may include the following:<br>stomach pains<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations  |

SIGMA NEXEON 710 N REDBROWN

## **SECTION 4: First aid measures**

| 4.3 Indication of any immediate medical attention and special treatment needed |   |  |  |
|--|---|--|--|
| Notes to physician   | <ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br/>The exposed person may need to be kept under medical surveillance for 48 hours.</li> </ul> |  |  |
| Specific treatments  | : No specific treatment.  |  |  |

| SECTION 5: | Firefighting | measures |
|------------|--------------|----------|
|------------|--------------|----------|

| 5.1 Extinguishing media<br>Suitable extinguishing | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
|---|---|
| media   |   |
| Unsuitable extinguishing media                    | : Do not use water jet.   |
| 5.2 Special hazards arising f                     | rom the substance or mixture  |
| Hazards from the substance or mixture             | : Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is very toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous combustion<br>products                  | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>sulfur oxides<br>halogenated compounds<br>metal oxide/oxides   |
| 5.3 Advice for firefighters                       |   |
| Special precautions for<br>fire-fighters          | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to Europear standard EN 469 will provide a basic level of protection for chemical incidents.   |
|   |   |

### **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro  | te | ctive equipment and emergency procedures  |
|--------------------------------|----|---|
| For non-emergency<br>personnel | :  | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources. No<br>flares, smoking or flames in hazard area. Do not breathe vapour or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment. |
| For emergency responders       | :  | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| 6.2 Environmental precautions  | :  | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.  |

Code : 00464074

SIGMA NEXEON 710 N REDBROWN

Date of issue/Date of revision :

: 14 February 2024

**SECTION 6: Accidental release measures** 

| 6.3 Methods and material        | for containment and cleaning up  |
|---------------------------------|--|
| Small spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other sections | <ul> <li>See Section 1 for emergency contact information.</li> <li>See Section 8 for information on appropriate personal protective equipment.</li> <li>See Section 13 for additional waste treatment information.</li> </ul>  |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Avoid exposure during pregnancy. Do not<br>handle until all safety precautions have been read and understood. Do not get in eyes<br>or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to<br>the environment. Use only with adequate ventilation. Wear appropriate respirator when<br>ventilation is inadequate. Do not enter storage areas and confined spaces unless<br>adequately ventilated. Keep in the original container or an approved alternative made<br>from a compatible material, kept tightly closed when not in use. Store and use away<br>from heat, sparks, open flame or any other ignition source. Use explosion-proof<br>electrical (ventilating, lighting and material handling) equipment. Use only non-sparking<br>tools. Take precautionary measures against electrostatic discharges. Empty containers<br>retain product residue and can be hazardous. Do not reuse container. |  |
|--|--|--|
| Advice on general<br>occupational hygiene                              | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |  |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.   |  |

#### 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

- Code : 00464074
- Date of issue/Date of revision :

: 14 February 2024

SIGMA NEXEON 710 N REDBROWN

### **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredient name  | Exposure limit values   |  |  |  |  |

| SIGMA NEXEON 710 N REDBROWN |                                |                    |

|                                 | Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this is<br>necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated. When prolonged or<br>frequently repeated contact may occur, a glove with a protection class of 6<br>(breakthrough time greater than 480 minutes according to EN 374) is recommended.<br>When only brief contact is expected, a glove with a protection class of 2 or higher<br>(breakthrough time greater than 30 minutes according to EN 374) is recommended.<br>The user must check that the final choice of type of glove selected for handling this<br>product is the most appropriate and takes into account the particular conditions of use,<br>as included in the user's risk assessment. |
|---------------------------------|--|
| Gloves                          | : For prolonged or repeated handling, use the following type of gloves:  |
|                                 | Not recommended: nitrile rubber<br>Recommended: butyl rubber, polyvinyl alcohol (PVA), Viton®, neoprene, natural rubber<br>(latex)   |
| Body protection                 | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. Refer to European Standard EN 1149 for further information on material and design requirements and test methods.   |
| Other skin protection           | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection          |  |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |

## **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878 Code : 00464074 Date of issue/Date of revision : 14 February 2024 SIGMA NEXEON 710 N REDBROWN **SECTION 11: Toxicological information** Inhalation : Toxic if inhaled. Ingestion : Harmful if swallowed. Skin contact : Causes skin irritation. Defatting to the skin. Eye contact : Causes serious eye damage. Symptoms related to the physical, chemical and toxicological characteristics Inhalation : Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations Ingestion ÷. Adverse symptoms may include the following: stomach pains reduced foetal weight increase in foetal deaths skeletal malformations Skin contact : Adverse symptoms may include the following: pain or irritation redness dryness cracking blistering may occur reduced foetal weight increase in foetal deaths skeletal malformations Eye contact : Adverse symptoms may include the following: pain watering redness Delayed and immediate effects as well as chronic effects from short and long-term exposure Short term exposure **Potential immediate** : Not available. effects Potential delayed effects : Not available. Long term exposure **Potential immediate** : Not available. effects Potential delayed effects : Not available. Potential chronic health effects Not available. **Conclusion/Summary** : Not available. : May cause damage to organs through prolonged or repeated exposure. Prolonged or General repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. Carcinogenicity : No known significant effects or critical hazards. **Mutagenicity** : No known significant effects or critical hazards. **Reproductive toxicity** : May damage the unborn child. Other information : Not available.

Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

|------------|-------------------|--------------------------------|--------------------|
| SIGMA NEXE | ON 710 N REDBROWN |                                |                    |

### **SECTION 12: Ecological information**

Soil/water partition coefficient (K<sub>oc</sub>) Mobility : Not available.

: Not available.

## 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

#### 12.6 Endocrine disrupting properties

Not available.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

### SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

| Product             |   |
|---------------------|---|
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. |
| Hazardous waste     | : Yes.  |

#### European waste catalogue (EWC)

| Waste code          | Waste designation  |  |  |
|---------------------|--|--|--|
| 08 01 11*           | waste paint and varnish containing organic solvents or other hazardous substances  |  |  |
| ackaging            |  |  |  |
| Methods of disposal | <ul> <li>The generation of waste should be avoided or minimised wherever possible. Waste<br/>packaging should be recycled. Incineration or landfill should only be considered when<br/>recycling is not feasible.</li> </ul>   |  |  |
| Type of packaging   | European waste catalogue (EWC)   |  |  |
| Container           | 15 01 06 mixed packaging   |  |  |
| Special precautions | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways drains and sewers. |  |  |
