# **SAFETY DATA SHEET**

Date of issue 14 March 2024

Version 8.08

## Section 1. Product and company identification

| Product name                  |
|-------------------------------|
| Product code                  |
| Other means of identification |
| Product type                  |

- : SIGMACOVER 256 BASE CREAM
- : 00175844
- : Not available.
- : Liquid.

#### Relevant identified uses of the substance or mixture and uses advised against

#### **Identified uses**

Coating. Paints. Painting-related materials.

| Uses advised against | Reason |
|----------------------|--------|
| Not applicable.      |        |

| Supplier's details:        |   |
|----------------------------|---|
| Supplier                   | <ul> <li>PPG Industries Colombia Ltda<br/>Calle 51 # 40-13<br/>Municipio de Itagüí<br/>Antioquia, Colombia<br/>(57) (4) 3787400 (Porteria)</li> </ul> |
| Email address:             | : HazComLatam@ppg.com   |
| Emergency telephone number | :<br>Colombia: 01 8000 916012 (CISPROQUIM)<br>+ 571 288 6012 (CISPROQUIM)<br>Ecuador: 1800-59-3005 (CISPROQUIM)<br>Peru: 080-050-847 (CISPROQUIM)     |

## Section 2. Hazards identification

| Classification of the substance or mixture | : FLAMMABLE LIQUIDS - Category 3<br>ACUTE TOXICITY (dermal) - Category 5<br>ACUTE TOXICITY (inhalation) - Category 4<br>SKIN IRRITATION - Category 2<br>SERIOUS EYE DAMAGE - Category 1<br>SKIN SENSITIZATION - Category 1<br>CARCINOGENICITY - Category 1A<br>TOXIC TO REPRODUCTION - Category 2<br>SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract<br>irritation) - Category 3<br>AQUATIC HAZARD (ACUTE) - Category 2 |
|--|---|
|  | AQUATIC HAZARD (ACUTE) - Category 2<br>AQUATIC HAZARD (LONG-TERM) - Category 2  |

|              |          |

14 March 2024

| Section 2. Hazards                                  | s identification   |
|---|--|
| Target organs                                       | : Contains material which causes damage to the following organs: brain, skin.<br>Contains material which may cause damage to the following organs: blood, kidneys,<br>lungs, the nervous system, the reproductive system, liver, heart, cardiovascular<br>system, upper respiratory tract, central nervous system (CNS), ears, eye, lens or<br>cornea, stomach.  |
|   | Percentage of the mixture consisting of ingredient(s) of unknown acute dermal toxicity: 63.6%<br>Percentage of the mixture consisting of ingredient(s) of unknown acute inhalation   |
|   | toxicity: 47.3%<br>Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 41%  |
| GHS label elements                                  |  |
| Hazard pictograms                                   |  |
|   |  |
| Signal word   | : Danger   |
| Hazard statements                                   | <ul> <li>Flammable liquid and vapor.<br/>May be harmful in contact with skin.<br/>Causes skin irritation.<br/>May cause an allergic skin reaction.<br/>Causes serious eye damage.<br/>Harmful if inhaled.<br/>May cause respiratory irritation.</li> </ul>   |
|   | May cause cancer.<br>Suspected of damaging fertility or the unborn child.<br>Toxic to aquatic life with long lasting effects.  |
| Precautionary statements                            |  |
| Prevention  | : Obtain special instructions before use. Wear protective gloves, protective clothing<br>and eye or face protection. Keep away from heat, hot surfaces, sparks, open<br>flames and other ignition sources. No smoking. Use explosion-proof electrical,<br>ventilating or lighting equipment. Use non-sparking tools. Take action to prevent<br>static discharges. Avoid release to the environment. Avoid breathing vapor. Wash<br>thoroughly after handling.  |
| Response  | : Collect spillage. IF exposed or concerned: Get medical advice or attention. IF<br>INHALED: Call a POISON CENTER or doctor if you feel unwell. Take off<br>contaminated clothing and wash it before reuse. IF ON SKIN: Call a POISON<br>CENTER or doctor if you feel unwell. Wash with plenty of water. If skin irritation or<br>rash occurs: Get medical advice or attention. IF IN EYES: Rinse cautiously with<br>water for several minutes. Remove contact lenses, if present and easy to do.<br>Continue rinsing. Immediately call a POISON CENTER or doctor. |
| Storage   | : Store in a well-ventilated place. Keep container tightly closed. Keep cool.  |
| Disposal  | : Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Other hazards which do not result in classification | : Causes digestive tract burns. Prolonged or repeated contact may dry skin and cause irritation.   |

Date of issue

8.08

## Section 3. Composition/information on ingredients

#### Substance/mixture Other means of identification

**CAS number** 

: Mixture

: Not available.

#### **CAS number/other identifiers**

: Not applicable.

| Ingredient name                                     | %          | CAS number |
|---|------------|------------|
| Epoxy Resin   | 20 - <30   | SUB110652  |
| Kaolin  | 15 - <20   | 1332-58-7  |
| xylene  | 12.5 - <15 | 1330-20-7  |
| Talc , not containing asbestiform fibres            | 7 - <10    | 14807-96-6 |
| trizinc bis(orthophosphate)                         | 7 - <10    | 7779-90-0  |
| Epoxy resin (MW ≤ 700)                              | 5 - <7     | 25068-38-6 |
| titanium dioxide                                    | 3 - <5     | 13463-67-7 |
| barium sulfate                                      | 3 - <5     | 7727-43-7  |
| ethylbenzene  | 2 - <3     | 100-41-4   |
| 2-methylpropan-1-ol                                 | 2 - <3     | 78-83-1    |

| 4-nonylphenol, branched                             | 1 - <2     | 84852-15-3 |
| crystalline silica, respirable powder (<10 microns) | 0.2 - <0.5 | 14808-60-7 |
| zinc oxide  | 0.1 - <0.2 | 1314-13-2  |
| Phenol, 2-nonyl-, branched                          | 0 - <0.1   | 91672-41-2 |

Date of issue

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

## Section 4. First aid measures

#### Description of necessary first aid measures

| Description of necessary ma               |  |
|---|--|
| Eye contact                               | : Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.                                  |
| Inhalation                                | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by<br>trained personnel. |
| Skin contact                              | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and<br/>water or use recognized skin cleanser. Do NOT use solvents or thinners.</li> </ul>                             |
| Ingestion                                 | : If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.   |
| Indication of immediate med               | ical attention and special treatment needed, if necessary  |
| Notes to physician<br>Specific treatments | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large</li> <li>quantities have been ingested or inhaled.<br/>No specific treatment.</li> </ul>                      |

| Code        | 00175844 |                           | Date of issue | 14 March 2024 | Version | 8.08 |
|-------------|----------|---------------------------|---------------|---------------|---------|------|
| Product nam | е        | SIGMACOVER 256 BASE CREAM |               |               |         |      |

# Section 4. First aid measures

| Protection of first-aiders     | : | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |
|--------------------------------|---|---|
| Potential acute health effects |   |   |
| Eye contact                    | : | Causes serious eye damage.  |
| Inhalation                     | : | Harmful if inhaled. May cause respiratory irritation.   |
| Skin contact                   | : | May be harmful in contact with skin. Causes skin irritation. Defatting to the skin.<br>May cause an allergic skin reaction.   |
| Ingestion                      | : | Corrosive to the digestive tract. Causes burns.   |

See toxicological information (Section 11)

## Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                 | : Do not use water jet.   |
| Specific hazards arising from the chemical     | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst,<br>with the risk of a subsequent explosion. This material is toxic to aquatic life with<br>long lasting effects. Fire water contaminated with this material must be contained<br>and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal<br>decomposition products    | <ul> <li>Decomposition products may include the following materials:<br/>carbon oxides<br/>sulfur oxides<br/>phosphorus oxides<br/>halogenated compounds<br/>metal oxide/oxides</li> </ul>  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>   |

# Section 6. Accidental release measures

| Personal precautions, protective equipment and emergency procedures |  |  |
|---|--|--|
| For non-emergency<br>personnel                                      | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate.<br>Put on appropriate personal protective equipment. |  |

# Section 7. Handling and storage

| Precautions for safe :<br>handling                                   | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Conditions for safe storage, :<br>including any<br>incompatibilities | Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.   |

|--------------|----------|------|

Date of issue

| Section | 8. Exposure | controls/personal | protection |
|---------|-------------|-------------------|------------|
|         |             |                   |            |

| •                                 |   |
|-----------------------------------|---|
| Eye protection<br>Skin protection | : Chemical splash goggles and face shield.  |
| Hand protection                   | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Gloves                            | : butyl rubber  |
| Body protection                   | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection             | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection            | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.  |

#### Delayed and immediate effects and also chronic effects from short and long term exposure

| Conclusion/Summary             | : | There are no data available on the mixture itself. This product contains crystalline silica which can cause lung cancer or silicosis. The risk of cancer depends on the duration and level of exposure to dust from sanding surfaces or mist from spray applications. For many products, TiO2 is utilized as a raw material in a liquid coating formulation. In this case, the TiO2 particles are bound in a matrix with no meaningful potential for human exposure to unbound particles of TiO2 when the product is applied with a brush or roller. Sanding the coating surface or mist from spray applications may be harmful depending on the duration and level of exposure and require the use of appropriate personal protective equipment and/or engineering controls (see Section 8). Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness. Solvents may cause some of the above effects by absorption through the skin. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact. |

# Section 11. Toxicological information

|                              | •   |
|------------------------------|---|
| Potential immediate effects  | : There are no data available on the mixture itself.  |
| Potential delayed effects    | : There are no data available on the mixture itself.  |
| Potential chronic health eff | <u>ects</u>   |
| Not available.               |   |
| General                      | <ul> <li>Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/<br/>or dermatitis. Once sensitized, a severe allergic reaction may occur when<br/>subsequently exposed to very low levels.</li> </ul> |
| Construction in the          | May aques senser. Dick of senser depends on duration and lovel of synaptics   |

Date of issue

- Carcinogenicity : May cause cancer. Risk of cancer depends on duration and level of exposure.
- **Mutagenicity** : No known significant effects or critical hazards.
- **Reproductive toxicity** : Suspected of damaging fertility or the unborn child.

#### Other adverse effects : No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** 

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
