| 1.4 Emergency telephone number  | : 00966 138473100 extn 1001                                       |

## **SECTION 2: Hazards identification**

2.1 Classification of the substance or mixture **Product definition** : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Skin Corr. 1B, H314 Eye Dam. 1, H318 Skin Sens. 1, H317 Repr. 2, H361fd Aquatic Acute 1, H400 Aquatic Chronic 1, H410 The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

| Code : 00322672   | Date of issue/Date of revision : 19 March 2024  |
|---|---|
| SIGMALINE 391PC HARDEN  | ER BLACK  |
| SECTION 2: Hazards  | identification  |
| Hazard pictograms   |   |
| Signal word   | : Danger  |
| Hazard statements   | <ul> <li>Causes severe skin burns and eye damage.</li> <li>May cause an allergic skin reaction.</li> <li>Suspected of damaging fertility. Suspected of damaging the unborn child.</li> <li>Very toxic to aquatic life with long lasting effects.</li> </ul> |
| Precautionary statements  |   |
| Prevention  | : Wear protective gloves, protective clothing and eye or face protection. Avoid release to the environment.   |
| Response  | : Collect spillage. IF INHALED: Immediately call a POISON CENTER or doctor. IF SWALLOWED: Immediately call a POISON CENTER or doctor.   |
| Storage   | : Not applicable.   |
| Disposal  | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and<br/>international regulations.</li> <li>P280, P273, P391, P304 + P310, P301 + P310, P501</li> </ul>   |
| Hazardous ingredients   | <ul> <li> <i>I</i> -tert-butylphenol         m-phenylenebis(methylamine)         Phenol, methylstyrenated         trimethylhexane-1,6-diamine         N,N'-ethane-1,2-diylbis(12-hydroxyoctadecan-1-amide)         </li> </ul>                              |
| Supplemental label elements   | : Not applicable.   |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Not applicable.   |
| Special packaging requirem  | ients   |
| Containers to be fitted<br>with child-resistant<br>fastenings   | : Not applicable.   |
| Tactile warning of danger   | : Not applicable.   |
| 2.3 Other hazards   |   |
| Product meets the criteria<br>for PBT or vPvB   | : This mixture does not contain any substances that are assessed to be a PBT or a vPvE  |
| Other hazards which do not result in classification   | : May cause endocrine disruption.   |

## **SECTION 3: Composition/information on ingredients**

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

Code: 00322672Date of issue/Date of revision: 19 March 2024SIGMALINE 391PC HARDENER BLACK

## **SECTION 4: First aid measures**

| 4.1 Description of first aid measures |   |  |
|---------------------------------------|---|--|
| Eye contact                           | : Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.   |  |
| Inhalation                            | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br>personnel.  |  |
| Skin contact                          | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br>or use recognised skin cleanser. Do NOT use solvents or thinners.   |  |
| Ingestion                             | <ul> <li>If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>  |  |
| Protection of first-aiders            | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |  |

## 4.2 Most important symptoms and effects, both acute and delayed

| Potential acute health ef | ffects   |
|---------------------------|--|
| Eye contact               | : Causes serious eye damage.   |
| Inhalation                | : No known significant effects or critical hazards.  |
| Skin contact              | : Causes severe burns. May cause an allergic skin reaction.  |
| Ingestion                 | : No known significant effects or critical hazards.  |
| Over-exposure signs/sy    | <u>mptoms</u>  |
| Eye contact               | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness   |
| Inhalation                | : Adverse symptoms may include the following:<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations  |
| Skin contact              | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations |
| Ingestion                 | : Adverse symptoms may include the following:<br>stomach pains<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations   |
| 4.3 Indication of any imm | ediate medical attention and special treatment needed  |
| Notes to physician        | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.               |
| Specific treatments       | : No specific treatment.   |

| SECTION 5: Eirofighting moscuros |                      |                                |                 |
|----------------------------------|----------------------|--------------------------------|-----------------|
| SIGMALINE                        | 391PC HARDENER BLACK |                                |                 |
| Code                             | : 00322672           | Date of issue/Date of revision | : 19 March 2024 |
|                                  |                      |                                |                 |

## SECTION 5: Firefighting measures

| 5.1 Extinguishing media                        |     |   |
|--|-----|---|
| Suitable extinguishing media                   | -   | Use an extinguishing agent suitable for the surrounding fire.   |
| Unsuitable extinguishing media                 | :   | None known.   |
| 5.2 Special hazards arising f                  | ron | n the substance or mixture  |
| Hazards from the substance or mixture          | :   | In a fire or if heated, a pressure increase will occur and the container may burst. This material is very toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.  |
| Hazardous combustion<br>products               | :   | Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>sulfur oxides<br>metal oxide/oxides  |
| 5.3 Advice for firefighters                    |     |   |
| Special precautions for<br>fire-fighters       | :   | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
| Special protective equipment for fire-fighters | :   | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |

## **SECTION 6: Accidental release measures**

## 6.1 Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Do not breathe vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|--------------------------------|--|
| For emergency responders       | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions  | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.   |
| 6.3 Methods and material for   | containment and cleaning up  |
| Small snill                    | : Stop leak if without risk. Move containers from spill area. Dilute with water and mon up   |

Small spill: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up<br/>if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and<br/>place in an appropriate waste disposal container. Dispose of via a licensed waste<br/>disposal contractor.

Code: 00322672Date of issue/Date of revision: 19 March 2024

SIGMALINE 391PC HARDENER BLACK

## **SECTION 6: Accidental release measures**

| Large spill                     | : Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spill product. |
|---------------------------------|---|
| 6.4 Reference to other sections | <ul> <li>See Section 1 for emergency contact information.</li> <li>See Section 8 for information on appropriate personal protective equipment.</li> <li>See Section 13 for additional waste treatment information.</li> </ul>   |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Advice on general occupational hygiene                                 | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.  |

#### 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

## **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 8.1 Control parameters

**Occupational exposure limits** 

| Code : 00322672                | Date of issue/Date of revision  | : 19 March 2024        |
|--------------------------------|---|------------------------|
| SIGMALINE 391PC HARDENER BLACK |   |                        |
| Product/ingredient name        | Exposure limit valu   | Ies                    |
| <mark>p</mark> ∕arium sulfate  | Abu Dhabi - OSHAD - Occupational air qu<br>values (United Arab Emirates, 7/2016).<br>TWA: 10 mg/m <sup>3</sup> 8 hours. | uality threshold limit |

|--|---|--|--|
| m-phenylenebis(methylamine)              |   | <ul> <li>values (United Arab Emirates, 7/2016). Absorbed through skin.<br/>Ceiling: 0.1 mg/m<sup>3</sup></li> <li>ACGIH TLV (United States, 1/2023). Absorbed through skin.<br/>C: 0.018 ppm</li> </ul>  |  |
| Recommended monitoring :<br>procedures   | : Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.   |  |  |
| 8.2 Exposure controls                    |   |  |  |
| Appropriate engineering :<br>controls    | local exhaust ver   | s generate dust, fumes, gas, vapour or mist, use process enclosures,<br>ntilation or other engineering controls to keep worker exposure to<br>nants below any recommended or statutory limits.   |  |
| Individual protection measures           |   |  |  |
| Hygiene measures :                       | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |  |  |
| Eye/face protection :<br>Skin protection | Chemical splash goggles and face shield.  |  |  |
| Hand protection :                        | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher |  |  |

English (GB) United Arab Emirates

When only brief contact is expected, a glove with a protection class of 2 or higher

| Code : 00322672                 | Date of issue/Date of revision : 19 March 2024   |
|---------------------------------|--|
| SIGMALINE 391PC HARDE           |  |
|                                 | (breakthrough time greater than 30 minutes according to EN 374) is recommended.<br>The user must check that the final choice of type of glove selected for handling this<br>product is the most appropriate and takes into account the particular conditions of use,<br>as included in the user's risk assessment.   |
| Gloves                          | : butyl rubber   |
| Body protection                 | <ul> <li>Personal protective equipment for the body should be selected based on the task being<br/>performed and the risks involved and should be approved by a specialist before<br/>handling this product.</li> </ul>  |
| Other skin protection           | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection          | : Use with adequate ventilation. In case of insufficient ventilation, wear suitable respiratory equipment. Wear a respirator conforming to EN140. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. Mask type: full-face mask half-face mask Filter type: organic vapour filter (Type A) particulate filter P3 Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. |
| Environmental exposure controls | <ul> <li>Emissions from ventilation or work process equipment should be checked to ensure<br/>they comply with the requirements of environmental protection legislation. In some<br/>cases, fume scrubbers, filters or engineering modifications to the process equipment<br/>will be necessary to reduce emissions to acceptable levels.</li> </ul>   |

## **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

| General   | : Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.  |
| Carcinogenicity                                 | : No known significant effects or critical hazards.  |
| Mutagenicity                                    | : No known significant effects or critical hazards.  |
| Reproductive toxicity                           | : Suspected of damaging fertility. Suspected of damaging the unborn child.   |
| Other information                               | : Not available.   |
| Sanding and grinding dusts m                    | ay be harmful if inhaled. Exposure to amine vanor has been reported to cause transient   |

Sanding and grinding dusts may be harmful if inhaled. Exposure to amine vapor has been reported to cause transient corneal edema described as blue haze, halo effect, foggy or blurred vision for several hours. This condition is typically temporary and does not cause permanent visual effects. When the proper eye protection specified in Section 8 is worn, exposure is significantly reduced and the condition has not been observed.

#### **12.4 Mobility in soil**

Soil/water partition : Not available. coefficient (Koc) **Mobility** : Not available.

## 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

#### 12.6 Endocrine disrupting properties

May cause endocrine disruption.

#### 12.7 Other adverse effects

Date of issue/Date of revision

: 19 March 2024

Code : 00322672

SIGMALINE 391PC HARDENER BLACK

## **SECTION 12: Ecological information**

No known significant effects or critical hazards.

## **SECTION 13: Disposal considerations**

: Yes.

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

## 13.1 Waste treatment methods

#### Product

| Methods of disposal | The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the               |
|---------------------|---|
|                     | requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products               |
|                     | via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. |

Hazardous waste

## European waste catalogue (EWC)

| Waste code | Waste designation   |
|------------|---|
| 08 01 11*  | waste paint and varnish containing organic solvents or other hazardous substances |

### **Packaging**

| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.  |  |
|---------------------|---|--|
| Type of packaging   | European waste catalogue (EWC)  |  |
| Container           | 15 01 06 mixed packaging  |  |
| Special precautions | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. |  |

## **SECTION 14: Transport information**

|                                    | ADR/RID         | IMDG                | ΙΑΤΑ   |
