# SAFETY DATA SHEET

Europe

Date of issue/Date of revision

: 22 March 2024

Version

: 1.12

# SECTION 1: Identification of the substance/mixture and of the company/ undertaking 1 1 Product identifier

| Product name                 | : STEELGUARD 951 BASE LIGHT GREY |  |
|------------------------------|----------------------------------|--|
| Product code                 | : 000001190404                   |  |
| Other means of identificatio | n                                |  |
| 00453044; 00472632           |                                  |  |

| 1.2 Relevant identified uses of the substance or mixture and uses advised against |   |  |
|---|---|--|
| Product use   | : Professional applications, Used by spraying.                    |  |
| Use of the substance/<br>mixture  | : Coating.  |  |
| Uses advised against  | : Product is not intended, labelled or packaged for consumer use. |  |

### 1.3 Details of the supplier of the safety data sheet

PPG Coatings Belgium BV/SRL Tweemontstraat 104 B-2100 Deurne Belgium Telephone +32-33606311 Fax +32-33606435

e-mail address of person : Product.Stewardship.EMEA@ppg.com responsible for this SDS

### 1.4 Emergency telephone number

### Supplier

+31 20 4075210

### **SECTION 2: Hazards identification**

### 2.1 Classification of the substance or mixture

**Product definition** : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Skin Irrit. 2, H315 Eye Irrit. 2, H319 Skin Sens. 1, H317 Aquatic Chronic 2, H411

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

| Code                           | : 000001190404 | Date of issue/Date of revision | : 22 March 2024 |
|--------------------------------|----------------|--------------------------------|-----------------|
| STEELGUARD 951 BASE LIGHT GREY |                |                                |                 |
|                                |                |                                |                 |

## **SECTION 2: Hazards identification**

| 2.2 Label elements                                    |  |
|---|--|
| Hazard pictograms                                     |  |
|   |  |
|   |  |
| Signal word   | : Warning  |
| Hazard statements                                     | : Causes skin irritation.  |
|   | May cause an allergic skin reaction.<br>Causes serious eye irritation.   |
|   | Toxic to aquatic life with long lasting effects.   |
| Precautionary statements                              |  |
| Prevention  | : Wear protective gloves. Wear eye or face protection. Avoid release to the environment. Avoid breathing vapour. Wash thoroughly after handling. |
| Response  | : Collect spillage.  |
| Storage   | Not applicable.  |
| Disposal  | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and<br/>international regulations.</li> </ul>        |
|   | P280, P273, P261, P264, P391, P501   |
| Hazardous ingredients                                 | : bisphenol F diglycidyl ether, isomer mixture<br>hexamethylene diacrylate   |
|   | Formaldehyde, oligomeric reaction products with 1-chloro-2,3-epoxypropane and phenol   |
|   | Phenol, styrenated<br>Dodecanedioic acid, polymer with 2,2'-[1,4-butanediylbis(oxymethylene)]bis[oxirane],                                       |
|   | (chloromethyl)oxirane, 4,4'-(1-methylethylidene)bis[phenol], nonanedioic acid and 2,2'-<br>oxybis[ethanol]                                       |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

<u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

English (GB)

Code : 000001190404

Date of issue/Date of revision

: 22 March 2024

STEELGUARD 951 BASE LIGHT GREY

### **SECTION 3: Composition/information on ingredients**

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures Eye contact : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice. In case of accidental eye contact, avoid direct exposure to the sun or other sources of UV light as severe irritation including burns may result. These reactions can be delayed - get medical attention if pain, irritation or blistering occurs after contact. Inhalation : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Skin contact : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners. Ingestion : If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting. **Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

### 4.2 Most important symptoms and effects, both acute and delayed

| Potential acute health effect | ts  |  |
|-------------------------------|-----|--|
| Eye contact                   | :   | Causes serious eye irritation.   |
| Inhalation                    | :   | No known significant effects or critical hazards.  |
| Skin contact                  | :   | Causes skin irritation. May cause an allergic skin reaction.   |
| Ingestion                     | :   | No known significant effects or critical hazards.  |
| Over-exposure signs/sympt     | on  | <u>15</u>  |
| Eye contact                   | :   | Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |
| Inhalation                    |     | No specific data.  |
| Skin contact                  | :   | Adverse symptoms may include the following:<br>irritation<br>redness   |
| Ingestion                     | :   | No specific data.  |
| 4.3 Indication of any immedia | ate | medical attention and special treatment needed   |
| Notes to physician            | :   | In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours. |
| Specific treatments           |     | No specific treatment  |

Specific treatments : No specific treatment.

| Code : 000001190404              | Date of issue/Date of revision | : 22 March 2024 |
|----------------------------------|--------------------------------|-----------------|
| STEELGUARD 951 BASE LIGHT GREY   |                                |                 |
| SECTION 5: Firefighting measures |                                |                 |

| 5.1 Extinguishing media<br>Suitable extinguishing<br>media | : Use an extinguishing agent suitable for the surrounding fire.   |
|--|---|
| Unsuitable extinguishing media                             | : None known.   |
| 5.2 Special hazards arising fr                             | rom the substance or mixture  |
| Hazards from the substance or mixture                      | : In a fire or if heated, a pressure increase will occur and the container may burst. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.   |
| Hazardous combustion<br>products                           | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>phosphorus oxides<br>halogenated compounds<br>metal oxide/oxides<br>Formaldehyde.  |
| 5.3 Advice for firefighters                                |   |
| Special precautions for<br>fire-fighters                   | <ul> <li>Promptly isolate the scene by removing all persons from the vicinity of the incident if<br/>there is a fire. No action shall be taken involving any personal risk or without suitable<br/>training.</li> </ul>   |
| Special protective<br>equipment for fire-fighters          | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |

# SECTION 6: Accidental release measures

| 6.1 Personal precautions, pro  | tective equipment and emergency procedures  |
|--------------------------------|---|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Avoid breathing vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders       | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| 6.2 Environmental precautions  | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.  |
| 6.3 Methods and material for   | containment and cleaning up   |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste  |

disposal contractor.

| Code : 000001190<br>STEELGUARD 951 BASE | -   | Date of issue/Date of revision   | : 22 March 2024  |
|---|---|--|--|
| <b>SECTION 6: Accid</b>                 | ental release mea   | sures  |  |
| Large spill                             | upwind. Prevent e<br>spillages into an ef<br>spillage with non-c<br>diatomaceous eart<br>Dispose of via a lic | t risk. Move containers from spill are<br>ntry into sewers, water courses, bas<br>fluent treatment plant or proceed as<br>ombustible, absorbent material e.g. s<br>h and place in container for disposal<br>censed waste disposal contractor. Co<br>e hazard as the spilt product. | ements or confined areas. Wash<br>follows. Contain and collect<br>sand, earth, vermiculite or<br>according to local regulations. |
| 6.4 Reference to other sections         | See Section 8 for i   | emergency contact information.<br>nformation on appropriate personal p<br>additional waste treatment informati   |  |

# **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid release to the environment. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.  |
|--|---|
|  | Materials such as cleaning rags, paper wipes and protective clothing, which are contaminated with the product may spontaneously self-ignite some hours later. To avoid the risks of fires, all contaminated materials should be stored in purpose-built containers or in metal containers with tight-fitting, self-closing lids. Contaminated materials should be removed from the workplace at the end of each working day and be stored outside.  |
| Advice on general occupational hygiene                                 | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

### 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

Code : 000001190404

Date of issue/Date of revision

: 22 March 2024

STEELGUARD 951 BASE LIGHT GREY

### SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 8.1 Control parameters

### **Occupational exposure limits**

| Product/ingredient name  | Exposure limit values                             |
|--------------------------|---|
| hexamethylene diacrylate | IPEL (-). Absorbed through skin. Skin sensitiser. |
|                          | TWA: 0.11 ppm                                     |
|                          | STEL: 0.33 ppm                                    |
| carbon                   | ACGIH TLV (United States).                        |
|                          | TWA: 10 mg/m³, (Inhalable)                        |

**Recommended monitoring procedures** : Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

### **DNELs**

| Product/ingredient name   | Туре         | Exposure              | Value                   | Population                    | Effects              |
|---------------------------|--------------|-----------------------|-------------------------|-------------------------------|----------------------|
| hexamethylene diacrylate  | DNEL         | Long term Dermal      | 1.66 mg/kg bw/day       | General population            | Systemic             |
|                           | DNEL         | Long term Oral        | 2.1 mg/kg bw/day        | General population            | Systemic             |
|                           | DNEL         | Long term Dermal      | 2.77 mg/kg bw/day       | Workers                       | Systemic             |

**SECTION 8: Exposure controls/personal protection** 

### **PNECs**

PNECs - Not available.

| 8.2 Exposure controls            |             |   |
|----------------------------------|-------------|---|
| Appropriate engineering controls | :           | Good general ventilation should be sufficient to control worker exposure to airborne contaminants.  |
| Individual protection meas       | <u>ures</u> |   |
| Hygiene measures                 | :           | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye/face protection              | :           | Chemical splash goggles. Use eye protection according to EN 166.  |
| Skin protection                  |             |   |
| Hand protection                  | :           | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. |
| Gloves                           | :           | polyethylene butyl rubber   |
| Body protection                  | :           | Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist before<br>handling this product.   |
| Other skin protection            |             | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection           | :           | Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Wear a respirator conforming to EN140. Filter type: organic vapour (Type A) and particulate filter P3  |
| Environmental exposure controls  | :           | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |

# **SECTION 10: Stability and reactivity**

| 10.1 Reactivity                            | : No specific test data related to reactivity available for this product or its ingredients.  |
|--|---|
| 10.2 Chemical stability                    | : The product is stable.  |
| 10.3 Possibility of<br>hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| 10.4 Conditions to avoid                   | : When exposed to high temperatures may produce hazardous decomposition products.<br>Refer to protective measures listed in sections 7 and 8.   |
| 10.5 Incompatible materials                | : Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.  |
| 10.6 Hazardous<br>decomposition products   | : Depending on conditions, decomposition products may include the following materials: carbon oxides nitrogen oxides phosphorus oxides halogenated compounds Formaldehyde. metal oxide/oxides |

# **SECTION 11:** Toxicological information

### **SECTION 11: Toxicological information**

| Long term exposure             |   |
|--------------------------------|---|
| Potential immediate<br>effects | : Not available.  |
| Potential delayed effects      | : Not available.  |
| Potential chronic health eff   | <u>ects</u>   |
| Not available.                 |   |
| <b>Conclusion/Summary</b>      | : Not available.  |
| General                        | : Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels. |
| Carcinogenicity                | : No known significant effects or critical hazards.   |
| Mutagenicity                   | : No known significant effects or critical hazards.   |
| Reproductive toxicity          | : No known significant effects or critical hazards.   |
| Other information              | : Not available.  |
|                                |   |

Acrylate components of the mixture have irritating properties. Prolonged or repeated contact with skin or mucous membrane may result in irritation symptoms, such as redness, blistering, dermatitis etc. May cause allergic skin reactions with repeated exposure. The inhalation of airborne droplets or aerosols may cause irritation of the respiratory tract. Ingestion may cause nausea, weakness and central nervous system effects. Contains a substance that may emit formaldehyde if stored beyond its shelf life and/or during cure at curing temperatures greater than 60C/140F. In case of accidental skin contact, avoid direct exposure to the sun or other sources of UV light as severe irritation including burns may result. These reactions can be delayed – get medical attention if pain, irritation, rash or blistering occurs after contact.

### 11.2 Information on other hazards

### 11.2.1 Endocrine disrupting properties

Not available. 11.2.2 Other information

Not available.

### **SECTION 12: Ecological information**

### 12.1 Toxicity

| Product/ingredient name  | Result               | Species | Exposure |
|--|----------------------|---------|----------|
| bisphenol F diglycidyl ether, isomer mixture   | EC50 >1.8 mg/l       | Algae   | 72 hours |
|  | EC50 >1000 mg/l      | Daphnia | 48 hours |
|  | LC50 2.54 mg/l       | Fish    | 96 hours |
|  | NOEC 0.3 mg/l        | Daphnia | 21 days  |
| Formaldehyde, oligomeric reaction products with 1-chloro-2,3-epoxypropane and phenol | Acute LC50 2.54 mg/l | Fish    | 96 hours |
| phosphorous oxychloride, reaction products with propylene oxide                      | EC50 82 mg/l         | Algae   | 72 hours |
|  | EC50 131 mg/l        | Daphnia | 48 hours |
|  | LC50 51 mg/l         | Fish    | 96 hours |
|  | NOEC 32 mg/l         | Daphnia | 48 hours |
| Phenol, styrenated   | Acute EC50 3.8 mg/l  | Daphnia | 48 hours |

Conclusion/Summary

: There are no data available on the mixture itself.

| Mobility              | : Not available. |

### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

### 12.6 Endocrine disrupting properties

Not available.

### 12.7 Other adverse effects

No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### **13.1 Waste treatment methods**

| <u>Product</u>         |   |
|------------------------|---|
| Methods of disposal    | : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. |
| Hazardous waste        | : Yes.  |
| European waste catalog | ue (EWC)  |
