SAFETY DATA SHEET

Conforms to Official Mexican Standard NOM-018-STPS-2015

Date of revision 12 April 2024

Version 14

Date of issue 12 April 2024

SECTION 1: Identification of the substance/mixture and of the company/undertaking

Product name	: SIGMA ECOFLEET 290 S REDBROWN
Product code	: 00249481
Other means of identification	: Not applicable.
Product type	: Liquid.
Relevant identified uses o	f the substance or mixture and uses advised against
Product use	: Professional applications, Used by spraying.
Use of the substance/ mixture	: Antifouling products
Uses advised against	: Not applicable.
Manufacturer	: PPG Industries, Inc. One PPG Place Pittsburgh, PA 15272
Emergency telephone number	: (412) 434-4515 (U.S.) (514) 645-1320 (Canada) SETIQ Interior de la República: 800-00-214-00 (México) SETIQ Ciudad de México: (55) 5559-1588 (México)
Technical Phone Number	: 888-977-4762

SECTION 2: Hazards identification

Classification of the substance or mixture	 FLAMMABLE LIQUIDS - Category 3 ACUTE TOXICITY (oral) - Category 4 ACUTE TOXICITY (dermal) - Category 5 ACUTE TOXICITY (inhalation) - Category 4 SKIN IRRITATION - Category 2 SERIOUS EYE DAMAGE - Category 1 SKIN SENSITIZATION - Category 2 Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity: 4.8% (oral), 26.1% (dermal), 28.5% (inhalation)
GHS label elements	

Hazard pictograms

Product name SIGMA ECOFLEET 290 S REDBROWN

SECTION 2: Hazards identification

 H226 - Flammable liquid and vapor. H302 + H332 - Harmful if swallowed or if inhaled. H313 - May be harmful in contact with skin. H315 - Causes skin irritation. H317 - May cause an allergic skin reaction. H318 - Causes serious eye damage. H351 - Suspected of causing cancer. P201 - Obtain special instructions before use. P202 - Do not handle until all safety precautions have been read and understood.
P202 - Do not handle until all safety precautions have been read and understood.
P202 - Do not handle until all safety precautions have been read and understood.
 P280 - Wear protective gloves, protective clothing and eye or face protection. P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. P271 - Use only outdoors or in a well-ventilated area. P261 - Avoid breathing vapor. P270 - Do not eat, drink or smoke when using this product.
P264 - Wash thoroughly after handling.
P272 - Contaminated work clothing should not be allowed out of the workplace.
 P308 + P313 - IF exposed or concerned: Get medical advice or attention. P304 + P340, P312 - IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor if you feel unwell. P301 + P312, P330 - IF SWALLOWED: Call a POISON CENTER or doctor if you feel unwell. Rinse mouth. P303 + P361 + P353 - IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water. P302 + P312, P352 - IF ON SKIN: Call a POISON CENTER or doctor if you feel unwell. Wash with plenty of water. P333 + P313 - If skin irritation or rash occurs: Get medical advice or attention. P305 + P351 + P338, P310 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor.
P405 - Store locked up.
P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.
Contains lead. Dried Film of This Paint May Be Harmful If Eaten or Chewed. Sanding and grinding dusts may be harmful if inhaled. Exposure to lead dust and fumes adversely affects blood and blood forming tissues, kidneys, liver, the central/ peripheral nervous systems and male/female reproductive organs. Lead exposure causes adverse developmental effects including brain damage in children and unborn fetuses. Prolonged or repeated contact may dry skin and cause irritation. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes

SECTION 3: Composition/information on ingredients

Substance/mixture
Product name

- : Mixture : SIGMA ECOFLEET 290 S REDBROWN
- Other means of

identification

: Not applicable.

Ingredient name	%	CAS number
dícopper oxide	≥20 - ≤48	1317-39-1
rosin	≥10 - ≤17	8050-09-7
zinc oxide	≥5.0 - ≤10	1314-13-2
4-methylpentan-2-one	≥5.0 - ≤7.4	108-10-1
Solvent naphtha (petroleum), light aromatic	≥5.0 - ≤10	64742-95-6
zineb (ISO)	≥1.0 - ≤5.4	12122-67-7
1,2,4-trimethylbenzene	≥1.0 - ≤4.7	95-63-6
diiron trioxide	≥1.0 - ≤5.0	1309-37-1
3-ethyltoluene	≥1.0 - ≤5.0	620-14-4
xylene	≤1.2	1330-20-7
Talc , not containing asbestiform fibres	≤1.0	14807-96-6
ethylbenzene	<1.0	100-41-4
lead monoxide	<0.10	1317-36-8

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

Description of necessary first aid measures

Eye contact	 Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.
Inhalation	 Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.
Skin contact	 Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.
Ingestion	 If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.

Most important symptoms/effects, acute and delayed

Potential acute health effects	
Eye contact	Causes serious eye damage.
Inhalation	Harmful if inhaled.
Skin contact	May be harmful in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.
Ingestion	Harmful if swallowed.
Over-exposure signs/sympto	ms

See toxicological information (Section 11)

Indication of immediate medical attention and special treatment needed, if necessary

SECTION 4: First aid measures

Notes to physician	: In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Specific treatments	: No specific treatment.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

SECTION 5: Firefighting measures

Extinguishing media	
Suitable extinguishing media	: Use dry chemical, CO ₂ , water spray (fog) or foam.
Unsuitable extinguishing media	: Do not use water jet.
Specific hazards arising from the chemical	: Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon oxides nitrogen oxides sulfur oxides metal oxide/oxides oxides of lead
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

SECTION 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel		No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders	:	If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

SECTION 6: Accidental release measures

Small spill	: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

SECTION 7: Handling and storage

Precautions for safe handling

Protective measures	: Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.
Special precautions	: Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Vapors are heavier than air and may spread along floors. Do not apply on toys and other children's articles, furniture, or interior surfaces of any dwelling or facility which may be occupied or used by children. Do not apply on exterior surfaces of dwelling units, such as window sills, porches, stairs, or railings, to which children may be commonly exposed. If this material is part of a multiple component system, read the Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts.
Advice on general occupational hygiene	: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	: Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Version 14

Product name SIGMA ECOFLEET 290 S REDBROWN

SECTION 7: Handling and storage

SECTION 8: Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
dicopper oxide	ACGIH TLV (United States, 1/2023). [Copper Fume]
rosin	TWA: 0.2 mg/m ³ 8 hours. Form: Fume ACGIH TLV (United States, 1/2023). [resin acids as total Resin acids] Skin sensitizer. Inhalation sensitizer.
zinc oxide	TWA: 0.001 mg/m ³ , (as total Resin acids) 8 hours. Form: Inhalable fraction NOM-010-STPS-2014 (Mexico, 4/2016). TWA: 2 mg/m ³ 8 hours. Form: Respirable fraction
	STEL: 10 mg/m ³ 15 minutes. Form:
4-methylpentan-2-one	Respirable fraction NOM-010-STPS-2014 (Mexico, 4/2016). TWA: 50 ppm 8 hours.
Salvant nanhtha (natralaum) light aramatia	STEL: 75 ppm 15 minutes. None.
Solvent naphtha (petroleum), light aromatic zineb (ISO)	None.
1,2,4-trimethylbenzene	NOM-010-STPS-2014 (Mexico, 4/2016). [Trimethyl benzene, mixed isomers] TWA: 25 ppm 8 hours.
diiron trioxide	NOM-010-STPS-2014 (Mexico, 4/2016). TWA: 5 mg/m ³ 8 hours. Form: Respirable fraction
3-ethyltoluene	None.
xylene	NOM-010-STPS-2014 (Mexico, 4/2016). [Xylenes (mixed)] STEL: 150 ppm 15 minutes.
Talc , not containing asbestiform fibres	TWA: 100 ppm 8 hours. NOM-010-STPS-2014 (Mexico, 4/2016). [Talc (without asbestos fibres)] STEL: 2 mg/m ³ 15 minutes. Form:
ethylbenzene	Respirable NOM-010-STPS-2014 (Mexico, 4/2016). TWA: 20 ppm 8 hours.
lead monoxide	NOM-010-STPS-2014 (Mexico, 4/2016). [Lead and inorganic compounds] TWA: 0.05 mg/m ³ , (as Pb) 8 hours.

Key to abbreviations

STEL = Short term exposure limit

TLV = Threshold Limit Value

TWA = Time Weighted Average

Consult local authorities for acceptable exposure limits.

= Internal Permissible Exposure Limit

procedures

= Ceiling Limit

С

IPEL

Recommended monitoring : Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

Product name SIGMA ECOFLEET 290 S REDBROWN

SECTION 8: Exposure controls/personal protection

Appropriate engineering controls	: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.
Environmental exposure controls	: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
Individual protection meas	ures
Hygiene measures	 Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	: Chemical splash goggles and face shield.
Skin protection	
Hand protection	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Gloves	: butyl rubber
Body protection	: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.
Other skin protection	: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	 Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.

SECTION 9: Physical and chemical properties

<u>Appearance</u>	
Physical state	: Liquid.
Color	: Brownish-red.
Odor	: Characteristic.
Odor threshold	: Not available.
Molecular weight	: Not applicable.
рН	: Not applicable.
Melting point	: Not available.

Mexico Page: 7/15

SECTION 9: Physical and chemical properties

			• •	
Boiling point	:	>37.78°C (>100°F)		
Flash point	:	Closed cup: 30°C (86°F)		
Auto-ignition temperature	:	Not available.		
Decomposition temperature		Not available.		
Flammability	1	Not available.		
Lower and upper explosive (flammable) limits	1	Not available.		
Evaporation rate	1	Not available.		
Vapor pressure	:	Not available.		
Vapor density	:	Not available.		
Relative density	:	1.68		
Density(lbs / gal)	:	14.02		
		Media	Result	
Solubility(ies)	1	cold water	Not soluble	
Solubility in water	:	Not available.		
Partition coefficient: n- octanol/water	:	Not applicable.		
Viscosity		Kinematic (40°C (104°F)): >21 mm²/s (>21 cSt)

% Solid. (w/w)	1	74.661		

SECTION 10: Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	 When exposed to high temperatures may produce hazardous decomposition products. Refer to protective measures listed in sections 7 and 8.
Incompatible materials	: Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.
Hazardous decomposition products	: Depending on conditions, decomposition products may include the following material carbon oxides nitrogen oxides sulfur oxides metal oxide/oxides

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and to immediate defects : There are no data available on the mixture itself. Expontial chonic health effects Potential delayed effects	Inhalation	: Harmful if inhaled.
Over-exposure signs/symptoms Eye contact : Adverse symptoms may include the following: pain watering redness Inhalation : No specific data. Skin contact : Adverse symptoms may include the following: pain or irritation redness dryness cracking bilistering may occur Ingestion : Adverse symptoms may include the following: siomach pains Delayed and immediate effects and also chronic effects from short and long term exposure Conclusion/Summary : There are no data available on the mixture itself. Contains lead. Exposure to lea dust and fumes adversely affects blood and blood forming tissues, kidneys, liver, central/peripheral nervous systems and male/female reproductive organs. Lead exposure causes adverse developmental effects including brain dmarge in child and unborn fetuses. Exposure to component solvent vapor concentrations in excess of the stated occupational exposure for adverse health effe such as mucous methorane and respirator insystem intration and adverse health eadcek, dizziness, fatigue, muscular weakness, drowsiness and, in externe cases, loss of consciousness. Solvents may cause some of the above effects the kidneys, liver and central nervous system. Symptoms and signs include head ache, dizziness, fatigue, muscular weakness, drowsiness and, in externe cases, loss of consciousness. Solvents may cause anne. If splashed in the eyes the liquid may cause irritation and reversible damage. Ingestion may cause naus diarribe and vormiting. This takes inits atome, there known, delayed and immediate effects and also chronic effects of components from short-term and io term exposure Potential immediate : There are no data available on the mixture itself.	Skin contact	: May be harmful in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.
Eye contact : Adverse symptoms may include the following: pain watering redness Inhalation : No specific data. Skin contact : Adverse symptoms may include the following: pain or irritation redness dryness cracking bilstering may occur Ingestion : Adverse symptoms may include the following: stomach pains Delayed and immediate effects and also chronic effects from short and long term exposure Conclusion/Summary : There are no data available on the mixture itself. Contains lead. Exposure to lea dust and fumes adversely affects blood and blood forming tissues, kidneys, liver, central/peripheral nervous systems and male/female reproductive organs. Lead exposure causes adverse developmental effects including brain dmage in childr and unborn fetuses. Exposure to component solvent vapor concentrations in excess of the state docupational exposure imit may result in adverse health effe such as mucous membrane and respiratory system irritation and adverse effects the kidneys, liver and central nervous systems. Symptoms and signs include headache, diziness, fatigue, muscular weakness, drowiness and, in extreme cases, loss of consciousness. Solvents may cause some of the abve effects the kidney liver apors in combination with constant loud noise can cause grate hearing loss than expected from exposure to noise alone. If splashed in the eyes the liquid may cause irritation and reversible damage. Ingestion may cause maus diarrihe and vorniting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and to term exposure Potential inmediate : There are no data available on the mixture itself. effects	Ingestion	: Harmful if swallowed.
pain watering redness No specific data. Skin contact : Adverse symptoms may include the following: pain or irritation redness dryness dryness gracking bilstering may occur Ingestion : Adverse symptoms may include the following: stomach pains Delayed and immediate effects and also chronic effects from short and long term exposure Conclusion/Summary : There are no data available on the mixture itself. Contains lead. Exposure to lead exposure causes adverse developmental effects including brain damage in childr and unborn fetuses. Exposure to component solvent vapor concentations in excess of the stated occupational exposure limit may result in adverse health effe such as muccus membrane and respiratory system irritation and adverse effects the kidneys, liver and central nervous system. Symptoms and signs include head ache, dizziness, fatigue, muscular wakness, drowsiness and, in extreme cases, loss of consciousness. Solvents may cause naus adverse the liquid may cause in irritation and daverse effects by absorption through the skin. There is some evidence that repeated exposure to organic solvent vapor sin combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. If splashed in the eyes the liquid may cause rause and also chronic effects of components from short-term and to the mersible admage. Ingestion may cause nause diarrhea and vormiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and to the teremestibe dadmage. ethylbenzene	3.6	79.43	Low	

Mobility in soil

Soil/water partition	: Not available.
coefficient (Koc)	

Other adverse effects

: No known significant effects or critical hazards.

SECTION 13: Disposal considerations

Disposal methods	The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply
	with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-
	recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of
	all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and
	its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues
	may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil,
	waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations. Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures
