Signal word

Product code 00445137

Version 2.01

Product name PPG VIKOTE 56 BASE Z

### Section 2. Hazards identification

| Hazard statements          | : | Flammable liquid and vapour.<br>Causes skin irritation.<br>Causes serious eye irritation.<br>Harmful if inhaled.<br>May cause respiratory irritation.<br>May cause drowsiness or dizziness.<br>May cause cancer.<br>May cause harm to breast-fed children.<br>Very toxic to aquatic life with long lasting effects.   |
|----------------------------|---|---|
| Precautionary statements   |   |   |
| Prevention                 | : | Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Avoid breathing vapour. Avoid contact during pregnancy and while nursing. Wash thoroughly after handling.  |
| Response                   | : | Collect spillage. IF exposed or concerned: Get medical advice or attention. IF<br>INHALED: Call a POISON CENTER or doctor if you feel unwell. Take off<br>contaminated clothing and wash it before reuse. IF ON SKIN: Wash with plenty of<br>water. IF IN EYES: Rinse cautiously with water for several minutes. Remove<br>contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists:<br>Get medical advice or attention. |
| Storage                    | : | Store in a well-ventilated place. Keep container tightly closed.  |
| Disposal                   | : | Not applicable.   |
| Other hezerde which do not |   | Drelenged or repeated contact may dry elvin and cause irritation  |

### result in classification

**Other hazards which do not** : Prolonged or repeated contact may dry skin and cause irritation.

# Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

#### **CAS number/other identifiers**

| CAS number | : Not applicable. |
|------------|-------------------|
| EC number  | : Mixture.        |

| Ingredient name                             | %        | CAS number |
|---|----------|------------|
| Solvent naphtha (petroleum), light aromatic | 20 - <25 | 64742-95-6 |
| xylene                                      | 10 - <20 | 1330-20-7  |
| 1,2,4-trimethylbenzene                      | 10 - <20 | 95-63-6    |
| alkanes, C14-17, chloro                     | 3 - <5   | 85535-85-9 |
| ethylbenzene                                | 1 - <3   | 100-41-4   |
| mesitylene                                  | 1 - <3   | 108-67-8   |
| propylbenzene                               | 1 - <3   | 103-65-1   |
| 1,2,3-trimethylbenzene                      | 1 - <3   | 526-73-8   |
| cumene                                      | 0.3 - <1 | 98-82-8    |
| methyl methacrylate                         | 0.3 - <1 | 80-62-6    |
| n-butyl methacrylate                        | 0.3 - <1 | 97-88-1    |
| toluene                                     | 0.3 - <1 | 108-88-3   |

| Singapore | English (GB) | Page: 2/15 |
|-----------|--------------|------------|
|-----------|--------------|------------|

Section 3. Composition/information on ingredients

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

### Section 4. First aid measures

| Description of necessary first aid measures |  |  |
|---|--|--|
| Eye contact                                 | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the<br/>eyelids apart for at least 10 minutes and seek immediate medical advice.</li> </ul>  |  |
| Inhalation                                  | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by<br/>trained personnel.</li> </ul> |  |
| Skin contact                                | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and<br/>water or use recognised skin cleanser. Do NOT use solvents or thinners.</li> </ul>   |  |
| Ingestion                                   | <ul> <li>If swallowed, seek medical advice immediately and show the container or label.</li> <li>Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>  |  |

#### Most important symptoms/effects, acute and delayed

| Potential acute health effects |   |
|--------------------------------|---|
| Eye contact                    | : Causes serious eye irritation.  |
| Inhalation                     | : Harmful if inhaled. Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. May cause respiratory irritation.   |
| Skin contact                   | : Causes skin irritation. Defatting to the skin.  |
| Ingestion                      | : Can cause central nervous system (CNS) depression.  |
| Over-exposure signs/sympto     | <u>ms</u>   |
| Eye contact                    | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                     | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations |

| Skin contact              | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations |
|---------------------------|---|
| Ingestion                 | : Adverse symptoms may include the following:<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations   |
| Indication of immediate m | nedical attention and special treatment needed, if necessary  |
| Notes to physician        | : Treat symptomatically. Contact poison treatment specialist immediately if large<br>quantities have been ingested or inhaled.  |
| Specific treatments       | : No specific treatment.  |

|                            | I  |
|----------------------------|--|
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate |
|                            | mask or self-contained breathing apparatus. It may be dangerous to the person  |
|                            | providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing   |
|                            | thoroughly with water before removing it, or wear gloves.  |

See toxicological information (Section 11)

### Section 5. Firefighting measures

| Extinguishing media                          |   |
|--|---|
| Suitable extinguishing media                 | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media               | : Do not use water jet.   |
| Specific hazards arising from the chemical   | : Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is very toxic to aquatic life with<br>long lasting effects. Fire water contaminated with this material must be contained<br>and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products     | : Decomposition products may include the following materials:<br>carbon oxides<br>halogenated compounds   |
| Special protective actions for fire-fighters | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |

Product name PPG VIKOTE 56 BASE Z

### Section 5. Firefighting measures

**Special protective** equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

### Section 6. Accidental release measures

| Personal precautions, protec   | tive equipment and emergency procedures  |
|--------------------------------|--|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.   |
| For emergency responders       | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities. Collect spillage.  |
| Methods and material for con   | ntainment and cleaning up  |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spill product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

# Section 7. Handling and storage

| Precautions for safe handling | ng  |
|-------------------------------|---|
| Protective measures           | : Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Avoid contact during pregnancy or while<br>nursing. Do not handle until all safety precautions have been read and understood.<br>Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or<br>mist. Avoid release to the environment. Use only with adequate ventilation. Wear<br>appropriate respirator when ventilation is inadequate. Do not enter storage areas<br>and confined spaces unless adequately ventilated. Keep in the original container or<br>an approved alternative made from a compatible material, kept tightly closed when<br>not in use. Store and use away from heat, sparks, open flame or any other ignition |
| Singapore English (GB)        | Page: 5/15  |

Product code 00445137 Product name PPG VIKOTE 56 BASE Z Version 2.01

### Section 7. Handling and storage

|  |   | source. Use explosion-proof electrical (ventilating, lighting and material handling)<br>equipment. Use only non-sparking tools. Take precautionary measures against<br>electrostatic discharges. Empty containers retain product residue and can be<br>hazardous. Do not reuse container.  |
|--|---|--|
| Advice on general<br>occupational hygiene                          | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

# Section 8. Exposure controls/personal protection

### **Control parameters**

Singapore

### **Occupational exposure limits**

| Ingredient name        | Exposure limits  |
|------------------------|--|
| kýlene                 | Workplace Safety and Health Act<br>(Singapore, 2/2006). [Xylene]<br>PEL (short term): 651 mg/m <sup>3</sup> 15 minutes.<br>PEL (short term): 150 ppm 15 minutes.<br>PEL (long term): 434 mg/m <sup>3</sup> 8 hours.<br>PEL (long term): 100 ppm 8 hours. |

| 1,2,3-trimethylbenzene | Workplace Safety and Health Act<br>(Singapore, 2/2006). [Trimethyl benzene]<br>PEL (long term): 123 mg/m <sup>3</sup> 8 hours.   |

Version 2.01

### Section 8. Exposure controls/personal protection

| -                                 |   |  |  |
|-----------------------------------|---|--|--|
| cumene                            | PEL (long term): 25 ppm 8 hours.<br>Workplace Safety and Health Act<br>(Singapore, 2/2006).   |  |  |
| methyl methacrylate               | PEL (long term): 246 mg/m <sup>3</sup> 8 hours.<br>PEL (long term): 50 ppm 8 hours.<br>Workplace Safety and Health Act<br>(Singapore, 2/2006).<br>PEL (long term): 410 mg/m <sup>3</sup> 8 hours.   |  |  |
| toluene                           | PEL (long term): 100 ppm 8 hours.<br>Workplace Safety and Health Act<br>(Singapore, 2/2006).<br>PEL (long term): 188 mg/m <sup>3</sup> 8 hours.<br>PEL (long term): 50 ppm 8 hours.   |  |  |
| Recommended monitoring procedures | : Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.   |  |  |
| Appropriate engineering controls  | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.  |  |  |
| Environmental exposure controls   | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |  |  |
| Individual protection measure     | <u>95</u>   |  |  |
| Hygiene measures                  | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location.   |  |  |
| Eye/face protection               | : Chemical splash goggles.  |  |  |
| Skin protection                   |   |  |  |
| Hand protection                   | Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |  |  |
| Gloves                            | : For prolonged or repeated handling, use the following type of gloves:   |  |  |
|                                   | May be used: nitrile rubber<br>Recommended: polyvinyl alcohol (PVA), Viton®   |  |  |

# Section 9. Physical and chemical properties

| <u>Appearance</u>         |   |   |  |  |  |
|---------------------------|---|---|--|--|--|
| Physical state            | : | Liquid.   |  |  |  |
| Colour                    | : | Various   |  |  |  |
| Odour                     | : | Aromatic.   |  |  |  |
| рН                        | : | insoluble in water.   |  |  |  |
| Boiling point             | : | >37.78°C (>100°F)   |  |  |  |
| Flash point               | : | Closed cup: 38°C (100.4°F)  |  |  |  |
| Evaporation rate          | : | Highest known value: 0.84 (ethylbenzene) Weighted average: 0.72compared with butyl acetate                              |  |  |  |
| Flammability (solid, gas) | : | liquid  |  |  |  |
| Vapour pressure           | : | Highest known value: 1.2 kPa (9.3 mm Hg) (at 20°C) (ethylbenzene). Weighted<br>average: 0.42 kPa (3.15 mm Hg) (at 20°C) |  |  |  |
| Vapour density            | : | Highest known value: 4.1 (Air = 1) (1,2,4-trimethylbenzene). Weighted average: 3.9 (Air = 1)                            |  |  |  |
| Relative density          | : | 0.96  |  |  |  |
| Bulk Density (g/cm³)      | : | 0.96  |  |  |  |
|                           |   | Media Result  |  |  |  |
| Solubility(ies)           | • | cold water Not soluble  |  |  |  |
| Auto-ignition temperature | : | Lowest known value: 280 to 470°C (536 to 878°F) (Solvent naphtha (petroleum), light aromatic).                          |  |  |  |
| Viscosity                 | ; | Kinematic (40°C (104°F)): >21 mm²/s (>21 cSt)   |  |  |  |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.                                     |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.  |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.  |
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids. |
| Hazardous decomposition products   | : Depending on conditions, decomposition products may include the following materials: carbon oxides halogenated compounds       |

# Section 11. Toxicological information

### Information on toxicological effects

#### Acute toxicity

| Product/ingredient name      | Result                 | Species | Dose                    | Exposure |
|------------------------------|------------------------|---------|-------------------------|----------|
| Solvent naphtha (petroleum), | LD50 Dermal            | Rabbit  | 3.48 g/kg               | -        |
| light aromatic               |                        | D.1     | 0.400                   |          |
|                              | LD50 Oral              | Rat     | 8400 mg/kg              | -        |
| xylene                       | LD50 Dermal            | Rabbit  | 1.7 g/kg                | -        |
|                              | LD50 Oral              | Rat     | 4.3 g/kg                | -        |

#### Numerical measures of toxicity

#### Acute toxicity estimates

| Route  | ATE value                               |
|--|---|
| ▶ Formal Inhalation (vapours) Inhalation (dusts and mists) | 4839.4 mg/kg<br>18.33 mg/l<br>2.01 mg/l |

#### Other information

Prolonged or repeated contact may dry skin and cause irritation. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/ aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

#### Mobility in soil

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects

: No known significant effects or critical hazards.

Section 13. Disposal considerations

**Disposal methods** 

: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

### Section 14. Transport information
