|   |  |

| Section 2. Hazards                                  | b identification  |
|---|---|
| Target organs                                       | : Contains material which causes damage to the following organs: brain.<br>Contains material which may cause damage to the following organs: blood, kidneys,<br>lungs, the nervous system, liver, cardiovascular system, upper respiratory tract, skin,<br>central nervous system (CNS), ears, eye, lens or cornea.   |
|   | Percentage of the mixture consisting of ingredient(s) of unknown acute dermal toxicity: 63.8%<br>Percentage of the mixture consisting of ingredient(s) of unknown acute inhalation toxicity: 19.1%  |
|   | Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 19.1%  |
| GHS label elements                                  |   |
| Hazard pictograms                                   |   |
| Signal word   | : Danger  |
| Hazard statements                                   | <ul> <li>Fammable liquid and vapor.<br/>May be harmful in contact with skin.<br/>Causes skin irritation.<br/>Causes serious eye irritation.<br/>Harmful if inhaled.<br/>May cause respiratory irritation.<br/>May cause cancer.<br/>Toxic to aquatic life.<br/>Harmful to aquatic life with long lasting effects.</li> </ul>  |
| Precautionary statements                            |   |
| Prevention  | : Obtain special instructions before use. Wear protective gloves, protective clothing<br>and eye or face protection. Keep away from heat, hot surfaces, sparks, open<br>flames and other ignition sources. No smoking. Use explosion-proof electrical,<br>ventilating or lighting equipment. Use non-sparking tools. Take action to prevent<br>static discharges. Avoid release to the environment. Avoid breathing vapor. Wash<br>thoroughly after handling.               |
| Response  | : IF exposed or concerned: Get medical advice or attention. IF INHALED: Call a POISON CENTER or doctor if you feel unwell. Take off contaminated clothing and wash it before reuse. IF ON SKIN: Call a POISON CENTER or doctor if you feel unwell. Wash with plenty of water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention. |
| Storage   | : Store in a well-ventilated place. Keep container tightly closed. Keep cool.   |
| Disposal  | : Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Other hazards which do not result in classification | : Prolonged or repeated contact may dry skin and cause irritation.  |

# Section 3. Composition/information on ingredients

### Substance/mixture Other means of identification

**CAS number** 

- : Mixture
- : 00181056; 00225003; 00311437

### **CAS number/other identifiers**

: Not applicable.

| Ingredient name   | %                 | CAS number               |
|---|-------------------|--------------------------|
| xylene  | 20 - <30          | 1330-20-7                |
| Talc , not containing asbestiform fibres titanium dioxide                                     | 7 - <10<br>5 - <7 | 14807-96-6<br>13463-67-7 |
| ethylbenzene  | 3 - <5            | 100-41-4                 |
| trizinc bis(orthophosphate)   | 0.5 - <1          | 7779-90-0                |
| Quaternary ammonium compounds, C12-14 (even-numbered)-<br>alkylethyldimethyl, ethyl sulphates | 0.5 - <1          | 1474044-65-9             |
| crystalline silica, respirable powder (<10 microns)   | 0.1 - <0.2        | 14808-60-7               |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

# Section 4. First aid measures

### Description of necessary first aid measures

| Description of necessary m                |  |
|---|--|
| Eye contact                               | : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.  |
| Inhalation                                | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.   |
| Skin contact                              | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.   |
| Ingestion                                 | : If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.   |
| Indication of immediate me                | cal attention and special treatment needed, if necessary   |
| Notes to physician<br>Specific treatments | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large</li> <li>quantities have been ingested or inhaled.<br/>No specific treatment.</li> </ul>  |
| Protection of first-aiders                | : No action shall be taken involving any personal risk or without suitable training. If is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |
| Potential acute health effect             |  |
| Eye contact                               | : Causes serious eye irritation.   |
| Inhalation                                | : Harmful if inhaled. May cause respiratory irritation.  |
| Skin contact                              | : May be harmful in contact with skin. Causes skin irritation. Defatting to the skin.  |
| Ingestion                                 | : No known significant effects or critical hazards.  |

# Section 4. First aid measures

See toxicological information (Section 11)

# Section 5. Fire-fighting measures

| Extinguishing media                               |  |
|---|--|
| Suitable extinguishing media                      | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media                    | : Do not use water jet.  |
| Specific hazards arising from the chemical        | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst,<br>with the risk of a subsequent explosion. This material is toxic to aquatic life. This<br>material is harmful to aquatic life with long lasting effects. Fire water contaminated<br>with this material must be contained and prevented from being discharged to any<br>waterway, sewer or drain. |
| Hazardous thermal decomposition products          | : Decomposition products may include the following materials:<br>carbon oxides<br>metal oxide/oxides   |
| Special protective actions for fire-fighters      | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |
| Special protective<br>equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>  |

Date of issue

# Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | :  | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|--------------------------------|----|---|
| For emergency responders       | :  | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | :  | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.  |
| Methods and materials for co   | on | tainment and cleaning up  |
| Small spill                    | :  | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble.   |

| and explosion-proof equipment. Dilute with water and mop up if water-soluble.           |
|---|
| Alternatively, or if water-insoluble, absorb with an inert dry material and place in an |
| appropriate waste disposal container. Dispose of via a licensed waste disposal          |
| contractor.   |
|   |

17 April 2024

| 4 |  |
|---|--|
|   |  |

# Section 6. Accidental release measures Large spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. Section 7. Handling and storage : Fut on appropriate personal protective equipment (see Section 8). Avoid exposure obtain special instructions before use. Do not handle until all safety precautions

e : Put on appropriate personal protective equipment (see Section 8). Avoid exposure obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only nonsparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

Materials such as cleaning rags, paper wipes and protective clothing, which are contaminated with the product may spontaneously self-ignite some hours later. To avoid the risks of fires, all contaminated materials should be stored in purpose-built containers or in metal containers with tight-fitting, self-closing lids. Contaminated materials should be removed from the workplace at the end of each working day and be stored outside.

Conditions for safe storage, including any incompatibilities Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

# Section 8. Exposure controls/personal protection

<u>Control parameters</u> <u>Occupational exposure limits</u>

# Section 8. Exposure controls/personal protection

| Ingredient name                          |   | Exposure limits   |  |  |
|--|---|---|--|--|
| xylene                                   |   | ACGIH TLV (United States, 1/2023). [p-<br>xylene and mixtures containing p-xylene]<br>Ototoxicant.  |  |  |
| Talc , not containing asbesti            | orm fibres  | TWA: 20 ppm 8 hours.<br><b>ACGIH TLV (United States, 1/2023).</b><br>TWA: 2 mg/m <sup>3</sup> 8 hours. Form: Respirable   |  |  |
| titanium dioxide<br>ethylbenzene         |   | ACGIH TLV (United States, 1/2023).<br>TWA: 2.5 mg/m <sup>3</sup> 8 hours. Form: respirable<br>fraction, finescale particles<br>ACGIH TLV (United States, 1/2023).   |  |  |
| enybenzene                               |   | Ototoxicant.<br>TWA: 20 ppm 8 hours.  |  |  |
| Recommended monitoring<br>procedures     |   | ppropriate monitoring standards. Reference to<br>r methods for the determination of hazardous   |  |  |
| Appropriate engineering<br>controls      | ventilation or other engineering of contaminants below any recomm   | on. Use process enclosures, local exhaust<br>controls to keep worker exposure to airborne<br>nended or statutory limits. The engineering control<br>dust concentrations below any lower explosive<br>ilation equipment.   |  |  |
| Environmental exposure<br>controls       | : Emissions from ventilation or work process equipment should be checked to ensu<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels. |   |  |  |
| ndividual protection measu               | <u>es</u>   |   |  |  |
| Hygiene measures                         | before eating, smoking and usin<br>Appropriate techniques should b  | thoroughly after handling chemical products,<br>g the lavatory and at the end of the working period<br>e used to remove potentially contaminated clothing<br>ore reusing. Ensure that eyewash stations and<br>workstation location.   |  |  |
| Eye protection<br><u>Skin protection</u> | : Chemical splash goggles.  |   |  |  |
| Hand protection                          | be worn at all times when handling<br>this is necessary. Considering the<br>check during use that the gloves<br>should be noted that the time to<br>different for different glove manu-   | gloves complying with an approved standard shoul<br>ng chemical products if a risk assessment indicate<br>he parameters specified by the glove manufacture<br>are still retaining their protective properties. It<br>breakthrough for any glove material may be<br>ifacturers. In the case of mixtures, consisting of<br>on time of the gloves cannot be accurately |  |  |
| Gloves                                   |   | ing, use the following type of gloves:  |  |  |
|  | Not recommended: nitrile rubber<br>Recommended: polyvinyl alcoho  |   |  |  |
|  |   |   |  |  |

# Section 8. Exposure controls/personal protection

| Body protection        | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.          |
|------------------------|--|
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>  |
| Respiratory protection | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. |

# Section 10. Stability and reactivity

| Hazardous decomposition products   | : Depending on conditions, decomposition products may include the following materials carbon oxides metal oxide/oxides           |
|------------------------------------|--|
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids. |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.  |
| Chemical stability                 | : The product is stable.   |
| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.                                     |

# Section 11. Toxicological information

# Section 11. Toxicological information

### Target organs

: Contains material which causes damage to the following organs: brain. Contains material which may cause damage to the following organs: blood, kidneys, lungs, the nervous system, liver, cardiovascular system, upper respiratory tract, skin, central nervous system (CNS), ears, eye, lens or cornea.

### **Aspiration hazard**

| Name | Result   |
|------|--|
|      | ASPIRATION HAZARD - Category 1<br>ASPIRATION HAZARD - Category 1 |

| Information on the likely<br>routes of exposure | 1 | Not available.  |
|---|---|---|
| Potential acute health effects                  |   |   |
| Eye contact                                     | 1 | Causes serious eye irritation.  |
| Inhalation                                      | 1 | Harmful if inhaled. May cause respiratory irritation.                               |
| Skin contact                                    | 1 | May be harmful in contact with skin. Causes skin irritation. Defatting to the skin. |
| Ingestion                                       | : | No known significant effects or critical hazards.                                   |

### Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
|--------------|---|
| Inhalation   | <ul> <li> <i>K</i>dverse symptoms may include the following:<br/>respiratory tract irritation<br/>coughing         </li> </ul>          |
| Skin contact | <ul> <li>              Adverse symptoms may include the following:<br/>irritation<br/>redness<br/>dryness<br/>cracking      </li> </ul> |
| Ingestion    | : No specific data.   |

### Delayed and immediate effects and also chronic effects from short and long term exposure

| Conclusion/Summary | : There are no data available on the mixture itself. This product contains crystalline silica which can cause lung cancer or silicosis. The risk of cancer depends on the duration and level of exposure to dust from sanding surfaces or mist from spray applications. For many products, TiO2 is utilized as a raw material in a liquid coating formulation. In this case, the TiO2 particles are bound in a matrix with no meaningful potential for human exposure to unbound particles of TiO2 when the product is applied with a brush or roller. Sanding the coating surface or mist from spray applications may be harmful depending on the duration and level of exposure and require the use of appropriate personal protective equipment and/or engineering controls (see Section 8). Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness |

# Section 11. Toxicological information

|                                |     | and, in extreme cases, loss of consciousness. Solvents may cause some of the above effects by absorption through the skin. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact. |
|--------------------------------|-----|---|
| <u>Short term exposure</u>     |     |   |
| Potential immediate<br>effects | :   | There are no data available on the mixture itself.  |
| Potential delayed effects      | :   | There are no data available on the mixture itself.  |
| Long term exposure             |     |   |
| Potential immediate<br>effects | :   | There are no data available on the mixture itself.  |
| Potential delayed effects      | :   | There are no data available on the mixture itself.  |
| Potential chronic health effe  | ect | <u>s</u>  |
| Not available.                 |     |   |
| General                        | 1   | Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/<br>or dermatitis.  |

| Carcinogenicity       | : May cause cancer. Risk of cancer depends on duration and level of exposure. |
|-----------------------|---|
| Mutagenicity          | : No known significant effects or critical hazards.                           |
| Reproductive toxicity | : 📈 known significant effects or critical hazards.                            |

# Section 12. Ecological information

**Other adverse effects** 

: No known significant effects or critical hazards.

# Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
