# **SAFETY DATA SHEET**

Date of issue/Date of revision

: 17 April 2024

Version

: 3.08

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier  |   |  |  |  |
|---|---|--|--|--|
| Product name  | : PPG VIKOTE 56 GREY 5198   |  |  |  |
| Product code  | : 000001087483  |  |  |  |
| Other means of identificati                                   | on  |  |  |  |
| 1.2 Relevant identified uses                                  | 1.2 Relevant identified uses of the substance or mixture and uses advised against |  |  |  |
| Product use   | : Professional applications, Used by spraying.                                    |  |  |  |
| Use of the substance/<br>mixture                              | : Coating.  |  |  |  |
| Uses advised against  | : Product is not intended, labelled or packaged for consumer use.                 |  |  |  |
| 1.3 Details of the supplier of the safety data sheet          |   |  |  |  |
| Sigma Paints Egypt<br>Villa#8, street 279<br>New Maadi, Cairo |   |  |  |  |

**SECTION 2: Hazards identification** 

#### 2.1 Classification of the substance or mixture Product definition : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Flam. Liq. 3, H226 Skin Irrit. 2, H315 Eye Irrit. 2, H315 Eye Irrit. 2, H319 Lact., H362 STOT SE 3, H335 STOT SE 3, H336 Aquatic Acute 1, H400 Aquatic Chronic 1, H410 The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

|---|---|--|--|
| SECTION 2: Hazards identification   |   |  |  |
| Hazard pictograms   |   |  |  |
| Signal word   | : Warning   |  |  |
| Hazard statements   | <ul> <li>Flammable liquid and vapour.<br/>Causes skin irritation.<br/>Causes serious eye irritation.<br/>May cause respiratory irritation.<br/>May cause drowsiness or dizziness.<br/>May cause harm to breast-fed children.<br/>Very toxic to aquatic life with long lasting effects.</li> </ul> |  |  |
| Precautionary statements  |   |  |  |
| Prevention  | : Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Avoid contact during pregnancy and while nursing.  |  |  |
| Response  | : Collect spillage.   |  |  |
| Storage   | : Store in a well-ventilated place. Keep container tightly closed.  |  |  |
| Disposal  | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and<br/>international regulations.</li> <li>P210, P273, P263, P391, P403 + P233, P501</li> </ul>  |  |  |
| Hazardous ingredients   | : Hydrocarbons, C9, aromatics < 0.1% cumene<br>alkanes, C14-17, chloro  |  |  |
| Supplemental label elements   | : Contains 1,3-bis[12-hydroxy-octadecamide-N-methylene]-benzene, n-butyl methacrylar and methyl methacrylate. May produce an allergic reaction.   |  |  |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Not applicable.   |  |  |
| Special packaging requiren  | <u>nents</u>  |  |  |
| Containers to be fitted<br>with child-resistant<br>fastenings   | : Not applicable.   |  |  |
| Tactile warning of danger   | : Not applicable.   |  |  |
| 2.3 Other hazards   |   |  |  |
| Product meets the criteria for PBT or vPvB  | : This mixture contains substances that are assessed to be a PBT or a vPvB, refer to Section 3.2.   |  |  |
| Other hazards which do  | · Prolonged or repeated contact may dry skin and cause irritation   |  |  |

**Other hazards which do** : Prolonged or repeated contact may dry skin and cause irritation. **not result in classification**

## **SECTION 3: Composition/information on ingredients**

#### Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

This mixture contains ≥ 1% of titanium dioxide. The Annex VI classification of titanium dioxide does not apply to this mixture according to Note 10.

Occupational exposure limits, if available, are listed in Section 8.

#### SUB codes represent substances without registered CAS Numbers.

### SECTION 4: First aid measures

| 4.1 Description of first aid n | neasures   |
|--------------------------------|--|
| Eye contact                    | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids<br/>apart for at least 10 minutes and seek immediate medical advice.</li> </ul>  |
| Inhalation                     | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.   |
| Skin contact                   | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br>or use recognised skin cleanser. Do NOT use solvents or thinners.  |
| Ingestion                      | <ul> <li>If swallowed, seek medical advice immediately and show the container or label. Keep<br/>person warm and at rest. Do NOT induce vomiting.</li> </ul>   |
| Protection of first-aiders     | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |

#### 4.2 Most important symptoms and effects, both acute and delayed

| Potential acute health effect | ,, <b>,</b> ,  |       |
|-------------------------------|--|-------|
| Eye contact                   | auses serious eye irritation.  |       |
| Inhalation                    | an cause central nervous system (CNS) depression. May cause drowsines<br>zziness. May cause respiratory irritation.  | ss or |
| Skin contact                  | auses skin irritation. Defatting to the skin.  |       |
| Ingestion                     | an cause central nervous system (CNS) depression.  |       |
| Over-exposure signs/sympt     |  |       |
| Eye contact                   | dverse symptoms may include the following:<br>ain or irritation<br>atering<br>dness  |       |
| Inhalation                    | dverse symptoms may include the following:<br>espiratory tract irritation<br>bughing<br>ausea or vomiting<br>eadache<br>rowsiness/fatigue<br>zziness/vertigo<br>nconsciousness<br>educed foetal weight<br>crease in foetal deaths<br>keletal malformations |       |

#### Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878 Code : 000001087483 Date of issue/Date of revision : 17 April 2024 PPG VIKOTE 56 GREY 5198 **SECTION 4: First aid measures Skin contact** : Adverse symptoms may include the following: irritation redness dryness cracking reduced foetal weight increase in foetal deaths

Ingestionskeletal malformationsIngestion: Adverse symptoms may include the following:<br/>reduced foetal weight<br/>increase in foetal deaths<br/>skeletal malformations

### 4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician  | : Treat symptomatically. Contact poison treatment specialist immediately if large |
|---------------------|---|
|                     | quantities have been ingested or inhaled.   |
| Specific treatments | : No specific treatment.  |

## **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media                           |   |
|---|---|
| Suitable extinguishing media                      | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                    | : Do not use water jet.   |
| 5.2 Special hazards arising f                     | rom the substance or mixture  |
| Hazards from the substance or mixture             | : Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is very toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous combustion products                     | : Decomposition products may include the following materials:<br>carbon oxides<br>halogenated compounds<br>metal oxide/oxides   |
| 5.3 Advice for firefighters                       |   |
| Special precautions for fire-fighters             | Promptly isolate the scene by removing all persons from the vicinity of the incident if<br>there is a fire. No action shall be taken involving any personal risk or without suitable<br>training. Move containers from fire area if this can be done without risk. Use water<br>spray to keep fire-exposed containers cool.   |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.   |

Code : 000001087483 Date of issue/Date of revision : 17 April 2024 PPG VIKOTE 56 GREY 5198

### **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro  | otective equipment and emergency procedures  |
|--------------------------------|--|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources. No<br>flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment. |
| For emergency responders       | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions  | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.   |
| 6.3 Methods and material for   | containment and cleaning up  |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into  |

sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with noncombustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. 6.4 Reference to other See Section 1 for emergency contact information. ŝ, See Section 8 for information on appropriate personal protective equipment.

See Section 13 for additional waste treatment information.

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

sections

| Protective measures                       | : Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Avoid contact during pregnancy or while nursing.<br>Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapour or<br>mist. Avoid release to the environment. Use only with adequate ventilation. Wear<br>appropriate respirator when ventilation is inadequate. Do not enter storage areas and<br>confined spaces unless adequately ventilated. Keep in the original container or an<br>approved alternative made from a compatible material, kept tightly closed when not in<br>use. Store and use away from heat, sparks, open flame or any other ignition source.<br>Use explosion-proof electrical (ventilating, lighting and material handling) equipment.<br>Use only non-sparking tools. Take precautionary measures against electrostatic<br>discharges. Empty containers retain product residue and can be hazardous. Do not<br>reuse container. |
|---|--|
| Advice on general<br>occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |

| Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878 |  |  |  |
|--|--|--|--|
| Code : 0000010874<br>PPG VIKOTE 56 GREY 519  |  |  |  |
| SECTION 7: Handling and storage  |  |  |  |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities   | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |  |  |

#### 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

## **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredient name         | Exposure limit values  |
|---------------------------------|--|
| xylene                          | Law Number 4 of 1994, Environmental Law, Annex 8 - Maximum<br>limits for air pollutants inside workplaces (Egypt, 8/2011).<br>[xylene (o-, m-, p-isomers)]<br>STEL: 651 mg/m <sup>3</sup> 15 minutes.<br>STEL: 150 ppm 15 minutes.<br>TWA: 434 mg/m <sup>3</sup> 8 hours.<br>TWA: 100 ppm 8 hours. |
| 1,2,4-trimethylbenzene          | Law Number 4 of 1994, Environmental Law, Annex 8 - Maximum<br>limits for air pollutants inside workplaces (Egypt, 8/2011).<br>[trimethylbenzene (mixed isomers)]<br>TWA: 123 mg/m <sup>3</sup> 8 hours.<br>TWA: 25 ppm 8 hours.  |
| titanium dioxide                | Law Number 4 of 1994, Environmental Law, Annex 8 - Maximum<br>limits for air pollutants inside workplaces (Egypt, 8/2011).<br>[titanium dioxide]<br>TWA: 10 mg/m <sup>3</sup> 8 hours.   |
| ethylbenzene                    | Law Number 4 of 1994, Environmental Law, Annex 8 - Maximum<br>limits for air pollutants inside workplaces (Egypt, 8/2011).<br>STEL: 543 mg/m <sup>3</sup> 15 minutes.<br>STEL: 125 ppm 15 minutes.<br>TWA: 434 mg/m <sup>3</sup> 8 hours.<br>TWA: 100 ppm 8 hours.                                 |
| mesitylene                      | Law Number 4 of 1994, Environmental Law, Annex 8 - Maximum<br>limits for air pollutants inside workplaces (Egypt, 8/2011).<br>[trimethylbenzene (mixed isomers)]<br>TWA: 123 mg/m <sup>3</sup> 8 hours.<br>TWA: 25 ppm 8 hours.  |
| carbon black, respirable powder | Law Number 4 of 1994, Environmental Law, Annex 8 - Maximum<br>limits for air pollutants inside workplaces (Egypt, 8/2011).<br>TWA: 3.5 mg/m <sup>3</sup> 8 hours.  |

| 2020/878  |   |
|---|---|
| Code : 000001087483                                       | Date of issue/Date of revision : 17 April 2024  |
| PPG VIKOTE 56 GREY 5198 Recommended monitoring procedures | : Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.   |
| 8.2 Exposure controls                                     |   |
| Appropriate engineering controls                          | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.  |
| Individual protection measur                              | <u>es</u>   |
| Hygiene measures  | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye/face protection<br>Skin protection                    | : Chemical splash goggles.  |
| Hand protection   | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. |
| Gloves  | : For prolonged or repeated handling, use the following type of gloves:   |
|   | May be used: nitrile rubber<br>Recommended: polyvinyl alcohol (PVA), Viton®, natural rubber (latex)   |
| Body protection   | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. Refer to European Standard EN 1149 for further information on material and design requirements and test methods.  |
| Other skin protection                                     | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection                                    | :   |
| Environmental exposure controls                           | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |

| Potential delayed effects     | Not available.  |   |
| Potential chronic health effe |   |   |
| Not available.                |   |   |
| <b>Conclusion/Summary</b>     | Not available.  |   |
| General                       | Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or<br>dermatitis.   | r |
| Carcinogenicity               | No known significant effects or critical hazards.   |   |
| Mutagenicity                  | No known significant effects or critical hazards.   |   |
| Reproductive toxicity         | May cause harm to breast-fed children.  |   |
| Other information             | Not available.  |   |
|                               |   |   |

Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

#### 11.2 Information on other hazards

#### **11.2.1 Endocrine disrupting properties**

Not available.

#### **11.2.2 Other information**

Not available.

## **SECTION 12: Ecological information**

### 12.6 Endocrine disrupting properties

Not available.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

### SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

#### **Product**

Methods of disposal : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. : Yes.

Hazardous waste

European waste catalogue (EWC)

| Waste code | Waste designation   |
|------------|---|
| 08 01 11*  | waste paint and varnish containing organic solvents or other hazardous substances |

#### **Packaging**

Methods of disposal

: The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

| Type of packaging   |   | European waste catalogue (EWC)   |
|---------------------|---|--|
| Container           | 15 01 06  | mixed packaging  |
| Special precautions | taken when<br>Empty conta<br>residues ma<br>Do not cut, v | al and its container must be disposed of in a safe way. Care should be<br>handling emptied containers that have not been cleaned or rinsed out.<br>ainers or liners may retain some product residues. Vapour from product<br>ay create a highly flammable or explosive atmosphere inside the container.<br>weld or grind used containers unless they have been cleaned thoroughly<br>woold dispersal of spilt material and runoff and contact with soil, waterways,<br>sewers. |

## **SECTION 14: Transport information**

### **SECTION 15: Regulatory information**

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture EU Regulation (EC) No. 1907/2006 (REACH)

Annex XIV - List of substances subject to authorisation

Annex XIV

None of the components are listed.

Substances of very high concern

| Intrinsic property | Ingredient name  | Status    | Reference<br>number | Date of revision |
|--------------------|--|-----------|---------------------|------------------|
| PBT                | medium-chain chlorinated paraffins UVCB<br>substances consisting of more than or equal<br>to 80% linear chloroalkanes with carbon<br>chain lengths within the range from C14 to<br>C17 | Candidate | D(2021)<br>4569-DC  | 7/8/2021         |
| vPvB               | medium-chain chlorinated paraffins UVCB<br>substances consisting of more than or equal<br>to 80% linear chloroalkanes with carbon<br>chain lengths within the range from C14 to<br>C17 | Candidate | D(2021)<br>4569-DC  | 7/8/2021         |

Annex XVII - Restrictions : Not applicable. on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles Other national and international regulations.

**Explosive precursors** : Not applicable.

Ozone depleting substances (1005/2009/EU)

Not listed.

**15.2 Chemical safety** 

: No Chemical Safety Assessment has been carried out.
