SAFETY DATA SHEET

Date of issue 17 April 2024

Version 1.04

Section 1. Product and company identification

Product name
Product code
Other means of identification
Product type

- : SIGMASHIELD 420/460/880/880GF HARDENER
- : 000001189596
- : \$\vec{0}0446815; 00446816; 00446819
- : Liquid.

Relevant identified uses of the substance or mixture and uses advised against

Identified uses

Coating. Paints. Painting-related materials.

Uses advised against	Reason
Not applicable.	

Supplier's details:	
Supplier	 PPG INDUSTRIES CHILE S.A. Puerto Madero 9710, Of. 23 Pudahuel - Chile Teléfono: +56 (2) 2571 0750 Fax: +56 (2) 2571 0752
Email address:	: HazComLatam@ppg.com
Emergency telephone number	: +56 (2) 2777 1994 (RITA CHILE)

Section 2. Hazards identification

Classification of the substance or mixture	 FLAMMABLE LIQUIDS - Category 3 ACUTE TOXICITY (oral) - Category 4 ACUTE TOXICITY (dermal) - Category 4 ACUTE TOXICITY (inhalation) - Category 4 SKIN CORROSION - Category 1C SERIOUS EYE DAMAGE - Category 1 SKIN SENSITIZATION - Category 1 CARCINOGENICITY - Category 2 SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract irritation) - Category 3 AQUATIC HAZARD (ACUTE) - Category 3 AQUATIC HAZARD (LONG-TERM) - Category 3
---	--

English (US)	Chile	1/15

Target organs	: Contains material which causes damage to the following organs: blood, liver, heart, brain.
	Contains material which may cause damage to the following organs: kidneys, lungs, the nervous system, gastrointestinal tract, upper respiratory tract, skin, central nervous system (CNS), ears, eye, lens or cornea.
	Percentage of the mixture consisting of ingredient(s) of unknown acute oral toxicity: 33.4%
	Percentage of the mixture consisting of ingredient(s) of unknown acute dermal toxicity: 33.4%
	Percentage of the mixture consisting of ingredient(s) of unknown acute inhalation toxicity: 52.9%
	Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 47.3%
GHS label elements	
Hazard pictograms	

Signal word	Danger	
Hazard statements	Flammable liquid and vapor. Harmful if swallowed, in contact with skin or if inhaled. Causes severe skin burns and eye damage. May cause an allergic skin reaction. May cause respiratory irritation. Suspected of causing cancer. Harmful to aquatic life with long lasting effects.	
Precautionary statements		
Prevention	Obtain special instructions before use. Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating or lighting equipment. Use non-sparking tools. Take action to prevent static discharges. Avoid release to the environment. Avoid breathing vapor. Do eat, drink or smoke when using this product. Wash thoroughly after handling.	
Response	IF exposed or concerned: Get medical advice or attention. IF INHALED: Immediately call a POISON CENTER or doctor. IF SWALLOWED: Immediately of a POISON CENTER or doctor. Rinse mouth. Do NOT induce vomiting. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with wa Immediately call a POISON CENTER or doctor. Wash contaminated clothing before reuse. IF ON SKIN: Call a POISON CENTER or doctor if you feel unwell. Wash with plenty of water. If skin irritation or rash occurs: Get medical advice or attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor.	
Storage	Store in a well-ventilated place. Keep container tightly closed. Keep cool.	
Disposal	Dispose of contents and container in accordance with all local, regional, national and international regulations.	

Code	00000118	9596	Date of issue	17 April 2024	Version	1.04
Product nam	ne	SIGMASHIELD 420/460/880/880GF	HARDENER			

Section 2. Hazards identification

Other hazards which do not : Prolonged or repeated contact may dry skin and cause irritation. **result in classification**

Classification according to : 3 (8) NCh382: Label according to : NCh2190:

Section 3. Composition/information on ingredients

Substance/mixture	
Other means of	
identification	

: Mixture

: 00446815; 00446816; 00446819

CAS number/other identifiers

CAS number : Not applicable.		
Ingredient name	%	CAS number
Epoxy Amine Resin xylene Propylidynetrimethanol, propoxylated, reaction products with ammonia benzyl alcohol 2-methylpropan-1-ol m-phenylenebis(methylamine) 2,4,6-tris(dimethylaminomethyl)phenol ethylbenzene	30 - <60 15 - <20 15 - <20 12.5 - <15 5 - <7 3 - <5 3 - <5 3 - <5 3 - <5	SUB123903 1330-20-7 39423-51-3 100-51-6 78-83-1 1477-55-0 90-72-2 100-41-4

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact	 Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.
Inhalation	 Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.
Skin contact	 Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.
Ingestion	: If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.

Indication of immediate medical attention and special treatment needed, if necessary

Section 4. First aid measures

Notes to physician Specific treatments: In case of inhalation of decomposition products in a fire, symptoms may be delayed : The exposed person may need to be kept under medical surveillance for 48 hours. No specific treatment.Protection of first-aiders: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.Potential acute health effects: Causes serious eye damage. : Harmful if inhaled. May cause respiratory irritation.Skin contact: Causes severe burns. Harmful in contact with skin. Defatting to the skin. May cause an allergic skin reaction.			
Protection of first-aidersNo specific treatment.Protection of first-aiders: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.Potential acute health effects: Causes serious eye damage.Inhalation: Harmful if inhaled. May cause respiratory irritation.Skin contact: Causes severe burns. Harmful in contact with skin. Defatting to the skin. May cause an allergic skin reaction.			
 is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. 	Ingestion	;	Harmful if swallowed.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media	
Suitable extinguishing media	: Use dry chemical, CO ₂ , water spray (fog) or foam.
Unsuitable extinguishing media	: Do not use water jet.
Specific hazards arising from the chemical	: Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is harmful to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon oxides nitrogen oxides
Special protective actions for fire-fighters	 Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures				
For non-emergency personnel	: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.			

Code 000001189596 Product name SIGMASH	Date of issue IELD 420/460/880/880GF HARDENER	17 April 2024	Version	1.04
Section 6. Accide	ntal release measures			
For emergency responders	: If specialized clothing is required to information in Section 8 on suitable information in "For non-emergency	and unsuitable materi		
Environmental precautions	: Avoid dispersal of spilled material and drains and sewers. Inform the releven environmental pollution (sewers, wa May be harmful to the environment in the envit the envit the environment in the environment in the environ	vant authorities if the pr tterways, soil or air). W	oduct has cause ater polluting ma	d
Methods and materials for c	ontainment and cleaning up			
Small spill	: Stop leak if without risk. Move conta and explosion-proof equipment. Dil Alternatively, or if water-insoluble, al appropriate waste disposal containe contractor.	ute with water and mor bsorb with an inert dry	o up if water-solu material and plac	ble. ce in an
Large spill	: Stop leak if without risk. Move conta and explosion-proof equipment. Ap sewers, water courses, basements of effluent treatment plant or proceed a combustible, absorbent material e.g and place in container for disposal a Dispose of via a licensed waste disp material may pose the same hazard emergency contact information and	proach release from up or confined areas. Wa as follows. Contain an . sand, earth, vermicul according to local regul posal contractor. Conta I as the spilled product	pwind. Prevent e ish spillages into d collect spillage ite or diatomaced ations (see Secti aminated absorb . Note: see Secti	entry into an with non- ous earth on 13). ent
Section 7. Handli	ng and storage			
Due continue for onfo	. Dut en engenniste neueral mete			

Precautions for safe handling	Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.
Conditions for safe storage, including any incompatibilities	: Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

=		
Control parameters		
Occupational exposure limit	<u>IS</u>	
Epoxy Amine Resin xileno		Not regulated. Ministry of Health (Chile, 2/2018). [Xylene] STEL: 651 mg/m ³ 15 minutes. STEL: 150 ppm 15 minutes. TWA: 380 mg/m ³ 8 hours. TWA: 87 ppm 8 hours.
Propylidynetrimethanol, propo Alcohol bencílico 2-Metilpropan-1-ol	oxylated, reaction products with ammonia	Not regulated. Not regulated. Ministry of Health (Chile, 2/2018). TWA: 133 mg/m ³ 8 hours. TWA: 44 ppm 8 hours.
m-phenylenebis(methylamine)	ACGIH TLV (United States, 1/2023). Absorbed through skin. C: 0.018 ppm
2,4,6-Tris(dimetilaminometil)f Etilbenceno	enol	Not regulated. Ministry of Health (Chile, 2/2018). STEL: 543 mg/m ³ 15 minutes. STEL: 125 ppm 15 minutes. TWA: 380 mg/m ³ 8 hours. TWA: 87 ppm 8 hours.
Recommended monitoring procedures		iate monitoring standards. Reference to nods for the determination of hazardous
Appropriate engineering controls Environmental exposure	contaminants below any recommende also need to keep gas, vapor or dust o limits. Use explosion-proof ventilation	Is to keep worker exposure to airborne d or statutory limits. The engineering controls concentrations below any lower explosive
controls	they comply with the requirements of e cases, fume scrubbers, filters or engir equipment will be necessary to reduce	environmental protection legislation. In some neering modifications to the process
Individual protection measur	<u>es</u>	
Hygiene measures	Appropriate techniques should be use Contaminated work clothing should no contaminated clothing before reusing. showers are close to the workstation le	lavatory and at the end of the working period. d to remove potentially contaminated clothing. of be allowed out of the workplace. Wash Ensure that eyewash stations and safety ocation.
Eye protection Skin protection	: Chemical splash goggles and face shi	eld.

Chile

Section 8. Exposure controls/personal protection

	• •
Hand protection	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Gloves	: nitrile neoprene
Body protection Other skin protection	 Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be
	approved by a specialist before handling this product.
Respiratory protection	: Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.

Section 9. Physical and chemical properties

Appearance

<u>Appearance</u>				
Physical state	:	Liquid.		
Color	:	Colorless.		
Odor	:	Amine-like. [Strong]		
рН	:	Not applicable.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

	UN	Brazil (ANTT)	IMDG	ΙΑΤΑ
UN number	UN3469	UN3469	UN3469	UN3469
UN proper shipping name	PAINT, FLAMMABLE, CORROSIVE	PAINT, FLAMMABLE, CORROSIVE	PAINT, FLAMMABLE, CORROSIVE	PAINT, FLAMMABLE, CORROSIVE
Transport hazard class(es)	3 (8)	3 (8)	3 (8)	3 (8)
Packing group	III	111	III	III
Environmental hazards	No.	No.	No.	No.
Marine pollutant substances	Not applicable.	Not applicable.	Not applicable.	Not applicable.
