Version

: 4.02

Saudi Arabia

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier  |   |
|---|---|
| Product name  | : SIGMACOVER 280 BASE YELLOW GREEN                                |
| Product code  | : 000001089910  |
| Other means of identificati   | on  |
| 00144497; 00144499; 00272   | 548   |
| 1.2 Relevant identified uses  | of the substance or mixture and uses advised against              |
| Product use   | : Professional applications, Used by spraying.                    |
| Use of the substance/<br>mixture  | : Coating.  |
| Uses advised against  | : Product is not intended, labelled or packaged for consumer use. |
| 1.3 Details of the supplier of  | the safety data sheet   |
| Sigma Paint Saudi Arabia Lto<br>PO Box 7509, Dammam 314<br>Saudi Arabia<br>Tel: 00966 138 47 31 00<br>Fax: 00966 138 47 17 34 |   |
| e-mail address of person responsible for this SDS   | : PS.ACEMEA@ppg.com   |
| 1.4 Emergency telephone   | : 00966 138473100 extn 1001                                       |

## **SECTION 2: Hazards identification**

2.1 Classification of the substance or mixture Product definition : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Flam. Liq. 3, H226 Skin Irrit. 2, H315 Eye Irrit. 2, H319 Skin Sens. 1, H317 STOT SE 3, H335 STOT RE 2, H373 Aquatic Chronic 2, H411 The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

number

| Code : 000001089910   |   | Date of issue/Date of revision  | : 17 April 2024          |  |
|---|---|---|--------------------------|--|
| SIGMACOVER 280 BASE YELLOW GREEN  |   |   |                          |  |
| SECTION 2: Hazards  | identification  |   |                          |  |
| Hazard pictograms   |   |   |                          |  |
| Signal word   | : Warning   |   |                          |  |
| Hazard statements   | : Flammable liquid a<br>Causes skin irritatio<br>May cause an aller<br>Causes serious eye<br>May cause respirat<br>May cause damage | on.<br>gic skin reaction.<br>e irritation.  | exposure.                |  |
| Precautionary statements  |   |   |                          |  |
| Prevention  |   | oves. Wear eye or face protection. Keep aw<br>pen flames and other ignition sources. No s   |                          |  |
| Response  | : Collect spillage.   |   |                          |  |
| Storage   | : Store in a well-vent  | ilated place. Keep container tightly closed.  |                          |  |
| Disposal  | international regula  | Dispose of contents and container in accordance with all local, regional, national a<br>international regulations.<br>P280, P210, P273, P391, P403 + P233, P501 |                          |  |
| Hazardous ingredients   | : xylene<br>Epoxy Resin (700 <mw<=1100)<br>crystalline silica, respirable powder (&lt;10 microns)</mw<=1100)<br>                    |   |                          |  |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

statements declared

above.

<u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

### **SECTION 4: First aid measures**

### 4.1 Description of first aid measures

| Eye contact                | : | Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.   |
|----------------------------|---|---|
| Inhalation                 | : | Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.  |
| Skin contact               | 1 | Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.  |
| Ingestion                  | 1 | If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.  |
| Protection of first-aiders | : | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

| 4.2 Most important symptoms and effects, both acute and delayed <u>Potential acute health effects</u> |  |  |  |  |
|---|--|--|--|--|
| Eye contact   | : Causes serious eye irritation.   |  |  |  |
| Inhalation  | : May cause respiratory irritation.  |  |  |  |
| Skin contact  | : Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.      |  |  |  |
| Ingestion   | : Corrosive to the digestive tract. Causes burns.  |  |  |  |
| <u>Over-exposure sig</u>  | gns/symptoms   |  |  |  |
| Eye contact   | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |  |  |  |
| Inhalation  | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing  |  |  |  |

| Code : 000001089910                               | Date of issue/Date of revision : 17 April 2024   |  |  |

| Skin contact                                      | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking  |  |  |
| Ingestion   | : Adverse symptoms may include the following: stomach pains  |  |  |
| 4.3 Indication of any immedia                     | ate medical attention and special treatment needed   |  |  |
| Notes to physician                                | <ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br/>The exposed person may need to be kept under medical surveillance for 48 hours.</li> </ul>  |  |  |
| Specific treatments                               | : No specific treatment.   |  |  |
| SECTION 5: Firefight                              | ing measures   |  |  |
| 5.1 Extinguishing media                           |  |  |  |
| Suitable extinguishing media                      | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |  |  |
| Unsuitable extinguishing media                    | : Do not use water jet.  |  |  |
| 5.2 Special hazards arising fr                    | rom the substance or mixture   |  |  |
| Hazards from the substance or mixture             | : Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |  |  |
| Hazardous combustion<br>products                  | <ul> <li>Decomposition products may include the following materials:<br/>carbon oxides<br/>nitrogen oxides<br/>metal oxide/oxides<br/>Formaldehyde.</li> </ul>   |  |  |
| 5.3 Advice for firefighters                       |  |  |  |
| Special precautions for<br>fire-fighters          | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |  |  |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to Europear standard EN 469 will provide a basic level of protection for chemical incidents.  |  |  |

## **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro  | tective equipment and e  | emergency procedures  |   |                                  |
|--------------------------------|--|---|---|----------------------------------|
| For non-emergency<br>personnel | Evacuate surrounding<br>entering. Do not toucl<br>flares, smoking or flan<br>adequate ventilation. | areas. Keep unnecessa<br>or walk through spilt m<br>nes in hazard area. Avo | I risk or without suitable train<br>ary and unprotected personn<br>aterial. Shut off all ignition s<br>id breathing vapour or mist.<br>ator when ventilation is inade | el from<br>ources. No<br>Provide |
| For emergency responders       |  | and unsuitable materials  | he spillage, take note of any<br>. See also the information ir  |                                  |
|                                | E  | nglish (GB)   | Saudi Arabia  | 5/16                             |

**SECTION 6: Accidental release measures** 

| 6.2 Environmental precautions | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.  |
|-------------------------------|---|
| 6.3 Methods and materia       | for containment and cleaning up   |
| Small spill                   | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
| Large spill                   | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same bazard as the spill product |

| 6.4 Reference to other | : See Section 1 for emergency contact information.                          |
|------------------------|---|
| sections               | See Section 8 for information on appropriate personal protective equipment. |
|                        | See Section 13 for additional waste treatment information.                  |

| Recommended monitoring<br>procedures : Reference should be made to monitoring standards, such as the following: European<br>Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposu<br>by inhalation to chemical agents for comparison with limit values and measurement<br>strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the<br>application and use of procedures for the assessment of exposure to chemical and<br>biological agents) European Standard EN 482 (Workplace atmospheres - General<br>requirements for the performance of procedures for the measurement of chemical<br>agents) Reference to national guidance documents for methods for the determination<br>of hazardous substances will also be required. |  |  |
| .2 Exposure controls   |  |  |
| controls other engineeri<br>recommended  | e only with adequate ventilation. Use process enclosures, local exhaust ventilation of<br>her engineering controls to keep worker exposure to airborne contaminants below an<br>commended or statutory limits. The engineering controls also need to keep gas,<br>pour or dust concentrations below any lower explosive limits. Use explosion-proof<br>ntilation equipment |  |
| ndividual protection measures  | ·  |  |

| 2020/878                           |   |
|------------------------------------|---|
| Code : 000001089                   |   |
| SIGMACOVER 280 BASE                | LOW GREEN   |
| Hygiene measures                   | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye/face protection                | : Chemical splash goggles.  |
| Skin protection                    |   |
| Hand protection                    | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. |
| Gloves                             | : butyl rubber  |
| Body protection                    | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. Refer to European Standard EN 1149 for further information on material and design requirements and test methods.  |
| Other skin protection              | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| <b>Respiratory protection</b>      | :   |
| Environmental exposure<br>controls | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |

## **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

SIGMACOVER 280 BASE YELLOW GREEN

**SECTION 11: Toxicological information** 

| General               | <ul> <li>May cause damage to organs through prolonged or repeated exposure. Prolonged or<br/>repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis.<br/>Once sensitized, a severe allergic reaction may occur when subsequently exposed to<br/>very low levels.</li> </ul> |
|-----------------------|---|
| Carcinogenicity       | : No known significant effects or critical hazards.   |
| Mutagenicity          | : No known significant effects or critical hazards.   |
| Reproductive toxicity | : No known significant effects or critical hazards.   |
| Other information     | : Not available.  |

Causes digestive tract burns. Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Contains a substance that may emit formaldehyde if stored beyond its shelf life and/or during cure at curing temperatures greater than 60C/140F. Avoid contact with skin and clothing.

#### 11.2 Information on other hazards

#### **11.2.1 Endocrine disrupting properties**

Not available.

#### 11.2.2 Other information

Not available.

## **SECTION 12: Ecological information**

#### 12.1 Toxicity

| Product/ingredient name    | Result                               | Species                               | Exposure |
|----------------------------|--------------------------------------|---------------------------------------|----------|
| ethylbenzene               | Acute EC50 1.8 mg/l Fresh<br>water   | Daphnia                               | 48 hours |

#### 12.4 Mobility in soil

| Soil/water partition | : Not available. |
|----------------------|------------------|
| coefficient (Koc)    |                  |
| Mobility             | : Not available. |

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

#### **12.6 Endocrine disrupting properties**

May cause endocrine disruption.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

## **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

| Product             |   |
|---------------------|---|
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. |
| Hazardous waste     | : Yes.  |

### European waste catalogue (EWC)

| Waste code          |                 | Waste designation   |
|---------------------|-----------------|---|
| 08 01 11*           | waste paint and | varnish containing organic solvents or other hazardous substances   |
| ackaging            |                 |   |
| Methods of disposal |                 | tion of waste should be avoided or minimised wherever possible. Waste should be recycled. Incineration or landfill should only be considered when not feasible. |
| Type of packaging   |                 | European waste catalogue (EWC)  |
| Container           | 15 01 06        | mixed packaging   |

| Conforms to Regulation ( | EC) No. 1907/2006 (RI | EACH), Annex II, as | amended by Comm | ission Regulation (EU) |
|--------------------------|-----------------------|---------------------|-----------------|------------------------|

SIGMACOVER 280 BASE YELLOW GREEN

## **SECTION 13: Disposal considerations**

| Special precautions | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. |
|---------------------|---|
|                     |   |

## **SECTION 14: Transport information**

|                                    | ADR/RID         | IMDG                      | IATA   |
|------------------------------------|-----------------|---------------------------|--|
| 14.1 UN number or ID<br>number     | UN1263          | UN1263                    | UN1263   |
| 14.2 UN proper<br>shipping name    | PAINT           | PAINT                     | PAINT  |
