Technical Data Sheet

DULUX INTERIOR POLYURETHANE MODIFIED ACRYLIC VARNISH WITH ALUMINUM OXIDE 50000
Water based product, gloss finish

Technical Specifications (21°C (70°F))

Solids by Volume – 32% (+/- 1%)
Solids by Weight – 34% (+/- 1%)

Volatile Organic Compounds (VOCs)*
According to ASTM D3960-05: < 250g/L
Canadian regulation: < 350 g/L

Colour
Transparent – do not tint

Gloss Level
• Gloss @ 60°: 80 - 100%
• Sheen @ 85°: n/a

Practical Coverage
450 - 520 sq. ft. per 3.78 litres
12- 13 sq. metres per litre @ 1 mils D.F.T. (Actual coverage will vary depending on substrate and application method.)

Resin Type
• Acrylic and Polyurethane Emulsion

Diluent
• Water

Viscosity* Ready to use

Flammability Non Flammable
Flash Point* n/a

Recommended Film Thickness*
(according to the maximum spreading rate)
• Wet: 3.2 mils
• Dry: 1.1 mils

Drying Time* @ 77°F/25°C - 50% Relative Humidity
*Drying & recoat times are dependent on temperature, humidity, ventilation and film thickness

Tack free: 1 – 2 hours
To recoat: 2 – 4 hours
Prior to circulation: 24 hours
To replace furniture: 7 days

Product Description

Dulux Polyurethane Modified Acrylic Varnish 50000 is an interior aluminum oxide enhanced acrylic-urethane latex varnish that protects, restores and enhances the natural beauty of new and previously varnished wood surfaces.

Dulux Polyurethane Modified Acrylic Varnish 50000:
• Non yellowing
• Aluminum oxide formulation provides added durability and wear resistance
• Easy application – no hardener required
• Self-sealing
• Quick dry
• Good resistance to abrasion, alcohol, water, food stains, grease and detergents

Intended Uses

• New and maintenance work
• Residential and Commercial sites
• Doors, furniture, woodwork and floors where a glossy finish is desired
• New or previously varnished wood surfaces
• Not for use over shellac

PPG Architectural Coatings Canada, Inc. warrants performance of its products to its intended use if properly applied in accordance with the label directions and the specifications of the technical data sheet. Having no control over the application methods and conditions or the circumstances related to its use, no other warranty, expressed or implied, statutory or otherwise is given. This limited warranty extends only to the original purchaser of the product and is not transferable or assignable. If the product fails to conform to this limited warranty, we will, at your option, furnish replacement product or refund the purchase price. This limited warranty excludes (1) labor or costs of labour for the application or removal of any product and (2) all other direct, indirect, incidental, special or consequential damages. July 2014

Available at Dulux Paints Stores across Canada and Betonel-Dulux Stores in Québec
SURFACE PREPARATION

All surfaces must be clean, solid, dry and free of dirt, dust, oil, soot, chalking, mildew, grease, wax, and other contaminants.

Mildew must be removed by washing affected area with a solution of 30% household bleach and 70% water. Rinse well.

Strip surface if it is not in good condition
Lightly sand glossy areas. Vacuum sanding residue.

Previously Varnished Wood: Lightly sand with 80 – 120 grit sandpaper to remove gloss and imperfections. If previous varnish is in poor condition sand down to bare wood. Remove sanding residue. Let dry thoroughly.

Bare Wood: sand smooth with 80 – 120 grit sandpaper (do not use steel wool) to obtain a uniform and flawless surface. Remove sanding residue. Let dry thoroughly.

Precaution: Dry sanding, flame cutting and/or welding of dry paint film will give rise to dust and/or hazardous fumes. Wet sanding should be used wherever possible. If exposure cannot be avoided by the provision of local exhaust ventilation, suitable respiratory protective equipment should be used.

Application

Ready-to-use product, do not thin.
Stir lightly with a paint stick, do not shake.
Pour the quantity of varnish needed into another container. Keep containers closed when not in use.
Apply uniformly in the direction of the wood grain on a fully dry surface. Avoid bubbles.
Let dry thoroughly between coats and sand lightly, in the direction of the wood grain, using 220 – 320 grit sandpaper. Remove sanding residue.

Application Conditions

Apply with good ventilation when air and surface temperatures are between 15º- 30ºC (59 - 86ºF)
Ideal temperature 20ºC± 5ºC (68ºF±)
Relative humidity: ideal between 15 – 50%, maximum 85%.
Conditions must be maintained during the application and for the next 24 hours.

Tools

Brush – synthetic bristles (nylon, polyester) Lamb’s wool application pad

SYSTEM RECOMMENDATIONS

Bare Wood:
• Dulux Polyurethane Modified Acrylic Varnish 50000 – three coats provides better durability.

Previously Varnished Wood:
• Dulux Polyurethane Modified Acrylic Varnish 50000 – one to three coats, depending on the surface condition. Three coats provides better durability.

Clean-up

Remove as much of the product as possible and clean tools with soap and lukewarm water immediately after use.

Surface Maintenance

Immediately wipe any spills. To remove stains on the floor, use a sponge and a non-abrasive cleaner; follow manufacturer’s instructions. Put cloth pads under furniture to avoid scratching floors.

Storage and Transportation

Keep product cool and dry.
DO NOT FREEZE

Disposal

Consult your municipality about proper disposal procedures in accordance with the laws and respect the environment or give leftover paint to someone who could use it: a neighbor or friend, a recreational service or a non-profit organization. Do not pour leftover product down the drain.

Safety Measures

Read the Material Safety Data Sheet. Avoid contact with eyes. Keep out of reach of children. Use only in well ventilated areas.
FIRST AID TREATMENT: If in contact with eyes, rinse thoroughly with clear water. If swallowed, do not induce vomiting. Call poison centre or physician immediately.
