

Low VOC Wax & Grease Remover

SX1005

ONECHOICE® SX1005 is a Low VOC Wax and Grease Remover. SX1005 is compliant with most of the stringent VOC rules across the country. When mixed 1:1 with water SX1005 meets the 0.21 VOC CARB requirement

SX1005 is specifically designed to remove waxes, grease, silicones, engine oil, and other contaminants. It can be used on bare metal, plastics, primers, or automotive finishes.

Application Data

SX1005 Low VOC Cleaner

- **SX1005 is used or applied at 0.21 VOC**
Blend 1 part SX1005 to 1 part water
- Apply a generous amount of SX1005/water mixture to a clean cloth or directly to the surface.
- The initial application will float contaminants to the surface, and the second wipe, using a separate clean dry cloth, will remove contaminants.
- For maximum results, wipe the surface dry while it is still wet, using a clean white cloth in one direction. This will eliminate the smearing of contaminants.
- Use SX1005/water mixture before and after sanding.
- SX1005 /water mixture quickly removes troublesome silicones and mold release agents from the substrate to be painted. SX1005/water mixture may also be used as prep and plastic cleaner. Just saturate a clean white cloth with the SX1005/water mixture and wipe on in one direction only. Immediately dry with a clean cloth. Use the SX1005/water mixture before and after sanding.

Cleaner for Plastics and Flexible Parts:

Technical Data:

Color	Clear
Intended Use	Solvent (Substrate Cleaner)
VOC Content as Packaged	0.41 lbs.gal / 49 gm/l
VOC Content and Mixed at 1:1	0.21 lbs.gal / 24 gm/l
Weight Per US gal.	8.37 lb/gal
Flash Point PMCC	> 200 F

Application Data

Important:

Improper application technique may result in a hazardous condition. Follow directions for respirator use. Wear eye and skin protection. Observe all applicable precautions.

See Material Safety Data Sheet and Labels for additional safety information and handling instructions.
