EHS Turbo Plus Clearcoat P190-1280

Product	Description
P190-1280	EHS Turbo Plus Clearcoat
P210-7644	EHS Hardener - Standard
P852-6442	EHS Thinner - Slow
P852-6444	EHS Thinner - Medium
P852-6446	EHS Thinner - Fast

Product Description

P190-1280 is the new premium CT Clearcoat from Autocolor. Designed specifically to meet the toughest requirements of today's fleet market, P190-1280 delivers outstanding final appearance and durability over either solvent or waterborne Basecoats. Formulated to make life simple, P190-1280 offers easy application, fast baking and reliable polishing.

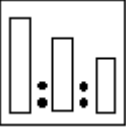

When used in accordance with the recommendations laid down in this data sheet, P190-1280 combined with *CT Waterborne and Solventborne Basecoats* will provide a Basecoat/Clearcoat finish with a VOC of less than 420g/l.

Product Data Sheet

Process

HVLP	
	P190-1280 Clear 3 parts P210-7644 Hardener 1 part P852-644x Thinner 0.5 part
	NOTES: 1. Stir paint well before mixing and use stick to ensure correct ratio of paint hardener and thinner 2. Stir paint IMMEDIATELY after activation
	Pot Life at 20°C: 2 hours The activated paint should be applied as soon as possible after activation Clean gun immediately after use
	19-22 secs DIN4 @ 20°C (24-28 secs BSB4) @ 20°C For optimum spray application properties ensure paint temperature is 20-25°C
	Gravity / Suction: Fluid tip: 1.4-1.8 mm Pressure Feed: 1.0 – 1.2 mm Pressure: As per spraygun manufacturers recommendations
	2 single coats
	Minimum of 10 minutes between coats at 20°C No flash-off required before stoving
	Air dry at 20°C Dust Free 45 minutes Handleable - 4 hours Into-Service - 16 hours Stoving at metal temperature of: 50°C 60 minutes 60°C 30 minutes 70°C 20 minutes Into-Service When cool
RECOAT	After "Into-Service" times

General Process Notes

SUBSTRATES

CT P961-lineAQUABASE® Plus Waterborne Basecoat activated with 30% by volume of P935-3006 activator, please refer to V1450V TDS.

CT P422 and P482 lines Solventborne Basecoats activated with 10% by volume of P210-982 hardener, please refer to V4130 TDS.

TURBO VISION Premium High Flow Topcoat Multistripe Process, please refer to Y0104 TDS.

PREPARATION

The substrate to be painted must be dry, clean and free from grease.

Basecoat areas which have been left overnight should be thoroughly Tak ragged before application of P190-1280.

PAINT TEMPERATURE

As with other paint systems, optimum spray application is achieved if the paint is allowed to reach room temperature (20-25°C) before use. This is particularly important for high solids systems. It is strongly recommended that cold paint is warmed to a minimum of 15°C before application. Below this temperature paint application performance may be adversely affected.

In order to remain VOC compliant do not add extra thinner to adjust the spraying viscosity.

HVLP APPLICATION

The most suitable HVLP gun for the application of Commercial Transport products is the pressure feed system.

Air cap pressure: 0.675 bar (10psi) maximum

Paint pressure: 0.3-1.0 bar (5-15 psi)

If long fluid lines are used, the paint pressure will need to be increased.

RECOAT

P190-1280 can be recoated with itself or any other **Nexa Autocolor** primer, undercoat or topcoat after the Into-Service times stated.

OTHER INFORMATION

Allow finishes to harden thoroughly before subjecting to vehicle washes. This can take a number of weeks if vehicles are air-dried in cold conditions and/or paint film thicknesses are excessively high.

DEMASKING

Care must be taken when demasking areas which have been coated with P190-1280 EHS Turbo Plus Clearcoat.

Low bake – It is recommended to demask whilst the vehicle is still warm from the oven. Demasking once the vehicle is cold may result in clearcoat delamination under certain conditions.

Air-dry: De-mask either before 6 hours drying time or after 36 hours drying time. Demasking at times between 6 and 36 hours may result in clearcoat delamination under certain conditions.

VOC INFORMATION

The EU limit value for this product (product category: IIB.d) in ready to use form is max. 420g/litre of VOC.
The VOC content of this product in ready to use form is max. 420g/litre when mixed with
P852-1792 EHS Turbo Plus Additive Thinner - Medium
Depending on the chosen mode of use, the actual ready to use VOC of this product may be lower than that specified by the EU Directive code.

These products are for professional use only, and are not to be used for purposes other than those specified. The information on this TDS is based on present scientific and technical knowledge, and it is the responsibility of the user to take all necessary steps in order to ensure the suitability of the product for the intended purpose.
