Water-Based Flatting Paste P562-100/-106

<i>Product</i>	<i>Description</i>
P562-100/-106	Water-Based Flatting Paste

Product Description

P562-100/-106 are water-based abrasives, which provide a fast and effective method of preparing surfaces for repainting particularly for fade-out repairs. They are silicone and wax-free, and any residue is easily washed off with water.

Product Data Sheet

Innovating Repair Solutions

PROCESS

	Ensure the whole area to be repaired has been thoroughly pre-cleaned.
	Apply P562-100 or P562-106 directly onto an abrasive Scotch-Brite™ pad (Ultrafine grey or equivalent). Use the pad and paste with water to 'key' or 'flat' the area to be painted.
	Wash off all residues with clean water and dry thoroughly with a clean cloth. The area should now have a uniform matt appearance. NOTE: Failure to remove all residues could impair adhesion of subsequent coats of paint.
	Wipe panel thoroughly using the appropriate Nexa Autocolor precleaner before applying paint.
	Apply Nexa Autocolor topcoat Refer to Aerosol Fade-out Process PDS.

VOC INFORMATION

This product falls outside of the scope of EU Directive 2004/42 and therefore does not have a VOC product category classification.

This product can be used by professional motor vehicle repairers.
