

## TECHNICAL DATASHEET

Issue date: November 2020

# SELEMIX<sup>®</sup> 2K POLYURETHANE SEMI-MATT TOPCOAT 7-512/-511 and 2.775.1160

#### **PRODUCT DESCRIPTION**

Selemix 7-512/-511 or 2.775.1160 2K Polyurethane Topcoat is a high quality semi-matt 2-pack Polyurethane finish for solid colours and single-layer metallic finishes. It dries quickly to give a semi-matt finish and very good durability. Application can be by conventional or air-assisted airless spray.

It is compatible with Selemix Epoxy and Polyurethane primers, giving a highly durable and hard wearing paint system. It is suitable for the coating of machinery, agricultural and construction equipment, and many other industrial painting applications where a durable, semi-matt finish is required.

| 1-208                            | Slow Thinner                                                                                                                                       |
| 1-470                            | Slow Direct Thinner                                                                                                                                |

#### SUBSTRATES AND PREPARATION

| Painted Surfaces<br>Polyurethane or<br>Polyester Fillers | Machine sand with P320-400 discs and degrease |
|----------------------------------------------------------|-----------------------------------------------|
| Selemix Epoxy Primers<br>or PU Primers                   | Refer to Primer TDS for recoat time           |

Apply only on a clean and dry surface with a temperature above the dew point to avoid condensation. In confined spaces, provide adequate ventilation during application and drying.

#### **MIXING**

Thoroughly mix paint before activating and check colour before use
