# **SAFETY DATA SHEET**

Date of issue/Date of revision 18 February 2022 Version 1

| Section 1. Identification                                   |   |
|---|---|
| Product name  | : BROWN HAA POLYESTER   |
| Product code  | : PCST20165   |
| Other means of identification                               | : Not available.  |
| Product type  | : Powder.   |
| Relevant identified uses of                                 | the substance or mixture and uses advised against   |
| Product use   | : Industrial applications.  |
| Use of the substance/<br>mixture                            | : Coating. Paints. Painting-related materials.  |
| Uses advised against  | : Not applicable.   |
| Manufacturer<br><u>Emergency telephone</u><br><u>number</u> | <ul> <li>PPG Industries, Inc.<br/>One PPG Place<br/>Pittsburgh, PA 15272</li> <li>(412) 434-4515 (U.S.)<br/>(514) 645-1320 (Canada)<br/>SETIQ Interior de la República: 800-00-214-00 (México)<br/>SETIQ Ciudad de México: (55) 5559-1588 (México)</li> </ul> |
| Technical Phone Number                                      | : 1-888-774-2001 (US and Canada)  |

# Section 2. Hazards identification

| OSHA/HCS status<br>Classification of the<br>substance or mixture | <ul> <li>This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).</li> <li>COMBUSTIBLE DUSTS CARCINOGENICITY - Category 2</li> <li>Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity: 50.1% (oral), 77.4% (dermal), 69.7% (inhalation)</li> </ul> |
|--|--|
| GHS label elements<br>Hazard pictograms                          |  |
| Signal word<br>Hazard statements                                 | <ul> <li>Warning</li> <li>Suspected of causing cancer.<br/>May form combustible dust concentrations in air.</li> </ul>   |

#### Product name BROWN HAA POLYESTER

### Section 2. Hazards identification

| Precautionary statements            |  |
|-------------------------------------|--|
| Prevention                          | : Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection.                                  |
| Response                            | : IF exposed or concerned: Get medical advice or attention.  |
| Storage                             | : Store locked up.   |
| Disposal                            | : Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Supplemental label elements         | : Keep container tightly closed. Keep away from heat, sparks, open flames and hot surfaces No smoking. Sanding and grinding dusts may be harmful if inhaled. Prevent dust accumulation. Emits toxic fumes when heated.       |
| Hazards not otherwise<br>classified | <ul> <li>Fine dust clouds may form explosive mixtures with air. Handling and/or processing of<br/>this material may generate a dust which can cause mechanical irritation of the eyes,<br/>skin, nose and throat.</li> </ul> |

# Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture             |
|-------------------|-----------------------|
| Product name      | : BROWN HAA POLYESTER |

| Ingredient name     | %           | CAS number     |
|---------------------|-------------|----------------|
| saturated polyester | ≥50 - ≤75   | Not available. |
| Limestone           | ≥20 - ≤50   | 1317-65-3      |
| barium sulfate      | ≥10 - ≤20   | 7727-43-7      |
| diiron trioxide     | ≥1.0 - ≤5.0 | 1309-37-1      |
| titanium dioxide    | ≤1.0        | 13463-67-7     |
| carbon black        | ≤1.0        | 1333-86-4      |

SUB codes represent substances without registered CAS Numbers.

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person. **Description of necessary first aid measures** 

| Eye contact  | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids<br/>apart for at least 10 minutes and seek immediate medical advice.</li> </ul>                        |
|--------------|--|
| Inhalation   | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br>personnel. |
| Skin contact | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.   |

Product name BROWN HAA POLYESTER

### Section 4. First aid measures

Ingestion

: If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.

#### Most important symptoms/effects, acute and delayed

| Potential acute health e  | ffects   |
|---------------------------|--|
| Eye contact               | : Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the eyes.   |
| Inhalation                | : Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose, throat and lungs.                               |
| Skin contact              | : No known significant effects or critical hazards.  |
| Ingestion                 | : No known significant effects or critical hazards.  |
| Over-exposure signs/sy    | r <u>mptoms</u>  |
| Eye contact               | : Adverse symptoms may include the following:<br>irritation<br>redness   |
| Inhalation                | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing  |
| Skin contact              | : No specific data.  |
| Ingestion                 | : No specific data.  |
| Indication of immediate r | nedical attention and special treatment needed, if necessary   |
| Notes to physician        | In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours. |
| Specific treatments       | : No specific treatment.   |

**Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

#### See toxicological information (Section 11)

Section 5 Fire-fighting measures

| Section 5. Fire-ing                        | Section 5. Fire-hynting measures   |  |  |
|--|--|--|--|
| Extinguishing media                        |  |  |  |
| Suitable extinguishing media               | : Use dry chemical powder.   |  |  |
| Unsuitable extinguishing media             | : Avoid high pressure media which could cause the formation of a potentially explosible dust-air mixture.                                |  |  |
| Specific hazards arising from the chemical | : Fine dust clouds may form explosive mixtures with air.   |  |  |
| Hazardous thermal decomposition products   | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>sulfur oxides<br>metal oxide/oxides |  |  |

Product name BROWN HAA POLYESTER

### Section 5. Fire-fighting measures

| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
|--|--|
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

### Section 6. Accidental release measures

| Personal precautions, protect  | <u>tiv</u> : | e equipment and emergency procedures   |
|--------------------------------|--------------|--|
| For non-emergency<br>personnel | :            | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing dust. Provide adequate<br>ventilation. Wear appropriate respirator when ventilation is inadequate. Put on<br>appropriate personal protective equipment.   |
| For emergency responders       | -            | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | :            | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).  |
| Methods and materials for co   | ont          | ainment and cleaning up  |
| Small spill                    | •            | Move containers from spill area. Use spark-proof tools and explosion-proof equipment.<br>Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a<br>HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed<br>waste disposal contractor.  |
| Large spill                    | :            | Move containers from spill area. Use spark-proof tools and explosion-proof equipment.<br>Approach release from upwind. Prevent entry into sewers, water courses, basements<br>or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with<br>equipment fitted with a HEPA filter and place in a closed, labeled waste container.<br>Avoid creating dusty conditions and prevent wind dispersal. Dispose of via a licensed<br>waste disposal contractor. Note: see Section 1 for emergency contact information and |

# Section 7. Handling and storage

#### **Precautions for safe handling Protective measures** 21 Put on appropriate personal protective equipment (see Section 8). Avoid exposure obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing dust. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Prevent dust accumulation. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition sources. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by **United States** Page: 4/13

Section 13 for waste disposal.

Product name BROWN HAA POLYESTER

# Section 7. Handling and storage

| Special precautions  | : | grounding and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container. If this material is part of a multiple component system, read the Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts.  |
|--|---|---|
| Advice on general occupational hygiene                             | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Do not store below the following temperature: 5°C (41°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. |

# Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name     | Exposure limits                                     |

Product name BROWN HAA POLYESTER

# Section 8. Exposure controls/personal protection

| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this is<br>necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated. |
|------------------------|--|
| Gloves                 | : For prolonged or repeated handling, use the following type of gloves:  |
|                        | Recommended: neoprene, natural rubber (latex)  |
| Body protection        | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Other skin protection  | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. The respiratory protection shall be in accordance to 29 CFR 1910.134.   |

Specific target organ toxicity (single exposure)

Not available.

#### Specific target organ toxicity (repeated exposure)

Not available.

Target organs

: Contains material which may cause damage to the following organs: lungs, upper respiratory tract, skin, eyes.

#### Aspiration hazard

Not available.

#### Information on the likely routes of exposure

#### Potential acute health effects

| Eye contact          | : Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the eyes.                   |
|----------------------|--|
| Inhalation           | : Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose, throat and lungs. |
| Skin contact         | : No known significant effects or critical hazards.  |
| Ingestion            | : No known significant effects or critical hazards.  |
| Over-exposure signs/ | <u>symptoms</u>  |
| Eye contact          | : Adverse symptoms may include the following:<br>irritation<br>redness   |

Product name BROWN HAA POLYESTER

# Section 11. Toxicological information

|  |            | 5  |
|--|------------|--|
| Inhalation   | :          | Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing  |
| Skin contact   | 1          | No specific data.  |
| Ingestion  | 1          | No specific data.  |
| Delayed and immediate effect   | ts         | and also chronic effects from short and long term exposure   |
| Conclusion/Summary   | :          | There are no data available on the mixture itself. Repeated exposure of the eyes to a low level of dust can produce eye irritation. Repeated or prolonged inhalation of dust may lead to chronic respiratory irritation. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact. |
| <u>Short term exposure</u>   |            |  |
| Potential immediate<br>effects   | 1          | There are no data available on the mixture itself.   |
| Potential delayed effects  | 1          | There are no data available on the mixture itself.   |
| Long term exposure   |            |  |
| Potential immediate effects  | :          | There are no data available on the mixture itself.   |
| Potential delayed effects  | 1          | There are no data available on the mixture itself.   |
| Potential chronic health effe  | <u>ect</u> | <u>S</u>   |
| General  | :          | Repeated or prolonged inhalation of dust may lead to chronic respiratory irritation.   |
| Carcinogenicity  | :          | Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.   |
| Mutagenicity   | 1          | No known significant effects or critical hazards.  |
| Reproductive toxicity  | :          | No known significant effects or critical hazards.  |
| Number of the second seco |            |  |

# Section 13. Disposal considerations

| Disposal methods            | : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. |
|-----------------------------|--|
| Dianagal should be in again | ardanaa with applicable regional national and local lowe and regulations   |

Disposal should be in accordance with applicable regional, national and local laws and regulations. Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures
