## Section 2. Hazards identification

| OSHA/HCS status                               | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).                       |
|---|---|
| Classification of the<br>substance or mixture | : COMBUSTIBLE DUSTS<br>CARCINOGENICITY - Category 2   |
|   | Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity: 60% (oral), 68% (dermal), 96% (inhalation) |
| GHS label elements                            |   |
| Hazard pictograms                             |   |
| Signal word                                   | : Warning   |
| Hazard statements                             | : Suspected of causing cancer.<br>May form combustible dust concentrations in air.  |
| Dressutionery statements                      |   |

#### Product name RED TEX HAA POLY

### Section 2. Hazards identification

| Prevention                       | : Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection.  |
|----------------------------------|--|
| Response                         | : IF exposed or concerned: Get medical advice or attention.  |
| Storage                          | : Store locked up.   |
| Disposal                         | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and<br/>international regulations.</li> </ul>  |
| Supplemental label elements      | <ul> <li>Keep container tightly closed. Keep away from heat, sparks, open flames and hot<br/>surfaces No smoking. Sanding and grinding dusts may be harmful if inhaled. Prevent<br/>dust accumulation. Emits toxic fumes when heated.</li> </ul> |
| Hazards not otherwise classified | <ul> <li>Fine dust clouds may form explosive mixtures with air. Handling and/or processing of<br/>this material may generate a dust which can cause mechanical irritation of the eyes,<br/>skin, nose and throat.</li> </ul>                     |

## Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture          |
|-------------------|--------------------|
| Product name      | : RED TEX HAA POLY |

| Ingredient name | %                              | CAS number                                |
|-----------------|--------------------------------|---|
|                 | ≥50 - ≤75<br>≥20 - ≤37<br>≤1.0 | Not available.<br>7727-43-7<br>13463-67-7 |

SUB codes represent substances without registered CAS Numbers.

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person.

#### Description of necessary first aid measures

| Eye contact  | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids<br/>apart for at least 10 minutes and seek immediate medical advice.</li> </ul>  |
|--------------|--|
| Inhalation   | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br/>personnel.</li> </ul> |
| Skin contact | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br/>or use recognized skin cleanser. Do NOT use solvents or thinners.</li> </ul>   |
| Ingestion    | <ul> <li>If swallowed, seek medical advice immediately and show this container or label. Keep<br/>person warm and at rest. Do NOT induce vomiting.</li> </ul>  |

#### Most important symptoms/effects, acute and delayed

### Product name RED TEX HAA POLY

## Section 4. First aid measures

| Potential acute health effe    | <u>icts</u>   |
|--------------------------------|---|
| Eye contact                    | : Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the eyes.  |
| Inhalation                     | : Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose, throat and lungs.  |
| Skin contact                   | : No known significant effects or critical hazards.   |
| Ingestion                      | : No known significant effects or critical hazards.   |
| <u>Over-exposure signs/sym</u> | <u>ptoms</u>  |
| Eye contact                    | : Adverse symptoms may include the following:<br>irritation<br>redness  |
| Inhalation                     | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing   |
| Skin contact                   | : No specific data.   |
| Ingestion                      | : No specific data.   |
| Indication of immediate me     | dical attention and special treatment needed, if necessary  |
| Notes to physician             | <ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br/>The exposed person may need to be kept under medical surveillance for 48 hours.</li> </ul> |
| Specific treatments            | : No specific treatment.  |
| Protection of first-aiders     | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.                  |

#### See toxicological information (Section 11)

## Section 5. Fire-fighting measures

| Extinguishing media                          |  |
|--|--|
| Suitable extinguishing media                 | : Use dry chemical powder.   |
| Unsuitable extinguishing media               | : Avoid high pressure media which could cause the formation of a potentially explosible dust-air mixture.  |
| Specific hazards arising from the chemical   | : Fine dust clouds may form explosive mixtures with air.   |
| Hazardous thermal decomposition products     | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>sulfur oxides<br>halogenated compounds<br>metal oxide/oxides  |
| Special protective actions for fire-fighters | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |

Product name RED TEX HAA POLY

### Section 5. Fire-fighting measures

Special protective equipment for fire-fighters

: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

### Section 6. Accidental release measures

| Personal precautions, protec   | Personal precautions, protective equipment and emergency procedures  |  |  |
|--------------------------------|--|--|--|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing dust. Provide adequate<br>ventilation. Wear appropriate respirator when ventilation is inadequate. Put on<br>appropriate personal protective equipment. |  |  |
| For emergency responders       | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |  |  |
| Environmental precautions      | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |  |  |
| Methods and materials for co   | ntainment and cleaning up  |  |  |
| Small spill                    | : Move containers from spill area. Use spark-proof tools and explosion-proof equipment.<br>Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a<br>HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed<br>waste disposal contractor.  |  |  |
| Large spill                    | : Move containers from spill area. Use spark-proof tools and explosion-proof equipment.<br>Approach release from upwind. Prevent entry into sewers, water courses, basements   |  |  |

Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Avoid creating dusty conditions and prevent wind dispersal. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures | : Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Do not handle until all safety precautions have<br>been read and understood. Do not get in eyes or on skin or clothing. Do not ingest.<br>Avoid breathing dust. Avoid the creation of dust when handling and avoid all possible<br>sources of ignition (spark or flame). Prevent dust accumulation. Use only with<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep<br>in the original container or an approved alternative made from a compatible material,<br>kept tightly closed when not in use. Electrical equipment and lighting should be<br>protected to appropriate standards to prevent dust coming into contact with hot surfaces,<br>sparks or other ignition sources. Take precautionary measures against electrostatic<br>discharges. To avoid fire or explosion, dissipate static electricity during transfer by<br>grounding and bonding containers and equipment before transferring material. Empty<br>containers retain product residue and can be hazardous. Do not reuse container. |
|---------------------|--|
|---------------------|--|

Product name RED TEX HAA POLY

## Section 7. Handling and storage

| Special precautions  | : If this material is part of a multiple component system, read the Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts.   |
|--|---|
| Advice on general<br>occupational hygiene                          | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | : Do not store below the following temperature: 5°C (41°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. |

## Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name   | Exposure limits                                      |
|---|--|
| saturated polyester   | ACGIH TLV (United States).                           |

## Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.<br>Refer to protective measures listed in sections 7 and 8. |
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.              |
|                                    | United States Page: 7/12  |

Product name RED TEX HAA POLY

## Section 10. Stability and reactivity

| Hazardous decomposition : | Depending on conditions, decomposition products may include the following materials: |
|---------------------------|--|
| products                  | carbon oxides nitrogen oxides sulfur oxides halogenated compounds metal oxide/       |
|                           | oxides   |

## Section 11. Toxicological information

#### Information on toxicological effects

#### Acute toxicity

| Product/ingredient name   | Result   |  |                 | Species            | Dose        | Exposure |
|---|--|--|-----------------|--------------------|-------------|----------|

|-----------------------|----------|-----------|------------------|
| Not available.        |          |           |                  |

| Tarc | let or | gans |
|------|--------|------|
|      |        |      |

: Contains material which may cause damage to the following organs: lungs, upper respiratory tract, eyes.

#### **Aspiration hazard**

Not available.

#### Information on the likely routes of exposure

#### Potential acute health effects

| i otentiai acute nearth enects  |  |
|---------------------------------|--|
| Eye contact                     | : Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the eyes.   |
| Inhalation                      | : Exposure to airborne concentrations above statutory or recommended exposure limits   |
|                                 | may cause irritation of the nose, throat and lungs.  |
|                                 | : No known significant effects or critical hazards.  |
| Ingestion                       | : No known significant effects or critical hazards.  |
| Over-exposure signs/sympto      | <u>ms</u>  |
| Eye contact                     | : Adverse symptoms may include the following:<br>irritation<br>redness   |
| Inhalation                      | : Adverse symptoms may include the following:  |
| Innalation                      | respiratory tract irritation   |
|                                 | coughing   |
| Skin contact                    | : No specific data.  |
|                                 |  |
| Ingestion                       | : No specific data.  |
|                                 | s and also chronic effects from short and long term exposure   |
| Conclusion/Summary              | : There are no data available on the mixture itself. Repeated exposure of the eyes to a low level of dust can produce eye irritation. Repeated or prolonged inhalation of dust may lead to chronic respiratory irritation. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact. |
| Short term exposure             |  |
| Potential immediate<br>effects  | : There are no data available on the mixture itself.   |
| Potential delayed effects       | : There are no data available on the mixture itself.   |
| Long term exposure              |  |
|                                 | : There are no data available on the mixture itself.   |
| effects                         |  |
| Potential delayed effects       | : There are no data available on the mixture itself.   |
| Potential chronic health effect | <u>xts</u>   |
| General                         | : Repeated or prolonged inhalation of dust may lead to chronic respiratory irritation.   |
| Carcinogenicity                 | Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.   |
| Mutagenicity                    | : No known significant effects or critical hazards.  |
|                                 | No known significant effects or critical hazards.  |
|                                 |  |

| titanium dioxide        | Acute LC50 >100 mg/l Fresh water | Daphnia - <i>Daphnia magna</i> | 48 hours |

#### Persistence and degradability

Not available.

#### **Bioaccumulative potential**

Not available.

<u>Mobility in soil</u>

Soil/water partition coefficient (Koc)

: Not available.

## Section 13. Disposal considerations

**Disposal methods** 

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures

#### **Additional information**

DOT: None identified.IMDG: None identified.IATA: None identified.

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not applicable. to IMO instruments

## Section 15. Regulatory information

#### United States

United States inventory (TSCA 8b) : All components are active or exempted.

#### SARA 302/304

SARA 304 RQ : Not applicable.

#### Composition/information on ingredients

No products were found.

#### SARA 311/312

#### Classification

: COMBUSTIBLE DUSTS CARCINOGENICITY - Category 2

#### **Composition/information on ingredients**

| Name             | %    | Classification               |
|------------------|------|------------------------------|
| titanium dioxide | ≤1.0 | CARCINOGENICITY - Category 2 |

## Additional environmental information is contained on the Environmental Data Sheet for this product, which can be obtained from your PPG representative.
