Apply when air and surface temperatures are above 50°F (10°C) and at least 5°F (3°C) above the dew point. Avoid priming late in the day when dew or condensation are likely for form or if rain is threatening. For exterior use only on wood substrates. Not recommended for hardboard siding. Top coat within two weeks. Drying times listed may vary depending on temperature, humidity and air movement. Spray equipment must be handled with due care and in accordance with manufacturer's recommendation. High-pressure injection of coatings into the skin by airless equipment may cause serious injury. DANGER: Rags, steel wood or waste soaked with this product may spontaneously catch fire if improperly discarded. Immediately after use, place rags, steel wool or waste in a sealed water-filled metal container. Refer to www.hpc.com, Spontaneous Combustion Advisory for additional information.

Our premium exterior alkyd primer is formulated to meet the performance requirements of residential and commercial applications. REZ® Wood Primer primes and seals new and repainted wood, including redwood and cedar. May be top-coated with oil or latex type paints or solid color stains. Ideal for use on previously stained or painted horizontal surfaces that will be coated with REZ® Solid Color Acrylic Deck Stain.

Features / Benefits

Excellent Sealing Properties
Excellent Adhesion
Excellent Moisture Resistance
Mildew Resistant on the Primer Film
For Excessively Chalky Substrates
For Blocking Stains

Limitations of Use

| Gloss: Satin: 0 to 25 (60°Gloss Meter) |
|-----------------|-----------------|
| VOC*: 2.83 lbs/gal (340.00 g/L) |
| DFT: 1.80 minimum to 2.20 maximum mils |
| Coverage: 400 to 500 sq. ft./gal. (37 to 46 sq. m/3.78L) |

Note: Does not include loss due to varying application method, surface porosity, or mixing.

Volume Solids*: 56.2% +/- 2.0%
Weight Solids*: 74.1% +/- 2.0%
Viscosity: 80 to 90 KU
Weight/Gallon*: 10.9 lbs. (5.0 kg) +/- 0.2 lbs. (91 g)

Cleanup: Paint Thinner

Drying Time:
To Touch: 8 to 12 hours
To Handle: 24 hours
To Recoat: 24 hours
To Full Cure: 24 to 48 hours

Dry Time @77°F (25°C); Topcoat within two weeks.

Flash Point: 113°F, (45°C)
Surface to be primed must be clean, dry, and free of dirt, loose and peeling paint, mildew, chalk, grease, rust, and other surface contaminants. Putty all nail holes and caulk all cracks and open seams. Sand all glossy, rough, and patched surfaces. Remove and inhibit regrowth of mildew by using PPG MILDEW CHECK® Multi-Purpose Wash, 18-1. Before use, be sure to read and follow the instructions and warnings on the label.

WARNING! If you scrape, sand, or remove old paint, you may release lead dust or fumes. LEAD IS TOXIC. EXPOSURE TO LEAD DUST OR FUMES CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a properly fitted NIOSH-approved respirator and prevent skin contact to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the USEPA National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead. In Canada contact a regional Health Canada office. Follow these instructions to control exposure to other hazardous substances that may be released during surface preparation.

NEW WOOD: New wood should be sanded smooth and wiped clean. Any knots or resinous areas should be sealed with shellac before painting. Countersink all nails. Putty flush with surface.

NEW REDWOOD AND CEDAR: When priming new redwood or cedar, allow 72 hours drying time and examine for discoloration. If any is found, apply a second primer coat before applying the finish. Topcoat within two weeks.

PREVIOUSLY PAINTED WOOD: All excessive chalking must be removed and the surface rinsed thoroughly. Remove all loose, peeling, or flaking paint by scraping or sanding. Feather back all rough edges to sound surface by sanding.

WEATHERED WOOD: Surface must be clean, dry, and free of dirt, loose and peeling paint, rust, mildew, and other surface contaminants. Putty all nail holes and caulk all cracks and open seams. Sand all loose wood fibers, rough, and patched surfaces. Remove and inhibit regrowth of mildew by using PPG MILDEW CHECK® Multi-Purpose Wash, 18-1.

Recommended Primers

none Refer to Surface Preparation Recommendations.

Application Information

Recommended Spread Rates:

| Wet Mils:      | 3.2  minimum to 4.0 maximum |
| Wet Microns:   | 81.3 minimum to 101.6 maximum |
| Dry Mils:      | 1.8  minimum to 2.2 maximum |
| Dry Microns:   | 45.7 minimum to 55.9 maximum |

Application Equipment:

Airless Spray: Pressure 2000 psi, tip 0.015” - 0.021”
Brush: High Quality Natural Bristle Brush
Roller: 3/16” - 3/8” nap roller cover
Thinning: DO NOT THIN.

Packaging: 1-Gallon (3.78L)

Not all products are available in all sizes.
